Sitka Gold Corp.

Notes to the Consolidated Financial Statements
For the Quarter Ended March 31, 2026
(Expressed in Canadian dollars)

1. Nature and continuance of operations

Sitka Gold Corp. (the "Company"), was incorporated on January 13, 2015 under the laws of the province of British Columbia. The Company's principal business activity is the exploration for mineral resources in North America.

The Company's shares trade on the TSX Venture Exchange under the symbol "SIG.V".

The Company's registered office and principal place of business is Suite 1500, 409 Granville Street, Vancouver, British Columbia, Canada.

These consolidated financial statements have been prepared on a going concern basis which assumes the Company will realize its assets and discharge its liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent upon its ability in the future to achieve profitable operations and, in the meantime, to obtain the necessary financing to meet its obligations and repay its liabilities when they become due. External financing, predominantly by the issuance of equity to the public, will be sought to finance the operations of the Company. Although the Company has a history of raising money, there is no guarantee of this in the future. As a result, there exists material uncertainty that casts significant doubt about the Company's ability to continue as a going concern. These consolidated financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business. Such adjustments could be material.

2. Basis of preparation**(a) Statement of compliance**

The consolidated financial statements for the quarter ended March 31, 2026 have been prepared in accordance with IFRS Accounting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). Therefore, these financial statements comply with International Accounting Standard ("IAS") 34 "Interim Financial Reporting".

The consolidated financial statements were authorized for issuance on May 15, 2026 by the directors of the Company.

(b) Basis of measurement

These financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information. These consolidated financial statements are presented in Canadian dollars, unless otherwise noted, which is also the Company's functional currency.

(c) Principles of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Arctic Copper Corp. and Sitka Gold (US) Corp. The controlled entity is fully consolidated from the date of acquisition, being the date on which the Company obtains control and continues to be consolidated until the date such control ceases. All intercompany transactions and balances have been eliminated upon consolidation.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements
For the Quarter Ended March 31, 2026

2. Basis of preparation (continued)

(d) Significant estimates and assumptions

The preparation of financial statements in accordance with IFRS requires the Company to use judgment in applying its accounting policies and make estimates and assumptions about reported amounts at the date of the financial statements and in the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumption where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the measurements for financial instruments, the recoverability of deferred tax assets and the measurement of flow-through share premium liabilities.

The preparation of financial statements in accordance with IFRS required the Company to make judgements, apart from those involving estimates, in applying accounting policies. The following are the most significant judgements that management has made in applying the Company's financial statements: the assessment of the Company's ability to continue as a going concern, measurement of share based compensation and whether there are indicators of impairment of the Company's exploration and evaluation assets.

3. Material accounting policy information

(a) Exploration and evaluation assets

Exploration costs incurred prior to the Company obtaining the legal right to explore an area are expensed in the period in which they are incurred.

Exploration and evaluation expenditures include the costs of acquiring licenses and costs associated with exploration and evaluation activity. Exploration and evaluation costs are capitalized. Option payments are considered acquisition costs provided that the Company has the intention of exercising the underlying option.

Property option agreements are exercisable entirely at the option of the optionee. Therefore, option payments (or recoveries) are recorded when payment is made (or received) and are not accrued.

When a project is deemed to no longer have commercially viable prospects to the Company, exploration and evaluation expenditures in respect of that project are deemed to be impaired. As a result, those exploration and evaluation expenditure costs, in excess of estimated recoveries, are written off to the statement of comprehensive loss/income.

Exploration and evaluation assets are tested for impairment if facts or circumstances indicate that impairment exists. Examples of such facts and circumstances are as follows:

- the period for which the Company has the right to explore in the specific area has expired during the period or will expire in the near future and is not expected to be renewed.
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered from the successful development or by sale.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction to capitalized exploration costs.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements

For the Quarter Ended March 31, 2026

(Expressed in Canadian dollars)

3. Material accounting policy information (continued)**(b) Impairment of non-financial assets**

The carrying amount of the Company's assets is reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of comprehensive loss.

The recoverable amount of assets is the greater of an asset's fair value less cost to sell and value in use. The estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount, however, not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognized in previous years.

(c) Income taxes**Current income tax:**

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax:

Deferred tax is recognized on temporary differences at the reporting date arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that future taxable income will be available to allow all or part of the temporary differences to be utilized. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted and are expected to apply by the end of the reporting period. Deferred tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements

For the Quarter Ended March 31, 2026

(Expressed in Canadian dollars)

3. Material accounting policy information (continued)**(d) Foreign currency translation**

The functional currency of each entity is determined using the currency of the primary economic environment in which that entity operates.

The functional and presentation currency, as determined by management, of the Company and its subsidiary is the Canadian dollar.

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the period-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in the statement of comprehensive loss in the period in which they arise.

(e) Share capital

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, share purchase warrants, options and flow-through shares are classified as equity instruments. Incremental costs directly attributable to the issue of new shares or options are recognized as a deduction from equity, net of tax.

(f) Cash and cash equivalents

Cash and cash equivalents consist of cash and short-term deposits with an original maturity date of ninety days or less, or redeemable on demand.

(g) Flow-through shares

Resource expenditure deductions for income tax purposes related to exploratory activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. Pursuant to the terms of the flow-through share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. On issuance, the Company bifurcates the flow-through share into (i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability, and (ii) share capital. Upon the expenses being incurred, the Company derecognizes the liability and recognizes a deferred tax liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income and the related deferred tax is recognized as a tax provision.

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period.

The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations. When applicable, this tax is accrued as a financial expense until qualifying expenditures are incurred.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements

For the Quarter Ended March 31, 2026

(Expressed in Canadian dollars)

3. Material accounting policy information (continued)**(h) Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

On initial recognition, financial assets are recognized at fair value and are subsequently classified and measured at: (i) amortized cost; (ii) fair value through other comprehensive income ("FVOCI"); or (iii) fair value through profit or loss ("FVTPL"). The classification of financial assets is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. A financial asset is measured at fair value net of transaction costs that are directly attributable to its acquisition except for financial assets at FVTPL where transaction costs are expensed. All financial assets not classified and measured at amortized cost or FVOCI are measured at FVTPL. On initial recognition of an equity instrument that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income.

The classification determines the method by which the financial assets are carried on the statement of financial position subsequent to inception and how changes in value are recorded. Cash and cash equivalent is measured at FVTPL. Receivables are measured at amortized cost.

Financial liabilities

Financial liabilities are designated as either: (i) fair value through profit or loss; or (ii) other financial liabilities. All financial liabilities are classified and subsequently measured at amortized cost except for financial liabilities at FVTPL. The classification determines the method by which the financial liabilities are carried on the statement of financial position subsequent to inception and how changes in value are recorded. Trade payables are classified under other financial liabilities and are measured at amortized cost.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire. The Company also derecognizes a financial liability when the terms of the liability and modified instrument are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value. Gains and losses on derecognition are generally recognized in profit or loss.

(i) Share-based payments

Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The corresponding amount is recorded to the share-based payment reserve. The fair value of options is determined using the Black-Scholes Option Pricing Model. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements
For the Quarter Ended March 31, 2026
(Expressed in Canadian dollars)

3. Material accounting policy information (continued)**(j) Asset retirement obligation**

A legal or constructive obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising for the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying value of the asset, as soon as the obligation to incur such costs arises. Risk-free discount rates using pre-tax rates that reflect the time value of money are used to calculate the net present value. The Company records a provision for environmental rehabilitation in the financial statements when it is incurred and capitalizes this amount as an increase in the carrying amount of the related asset. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight-line method. The related liability is adjusted each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses.

(k) Accounting Standards and Interpretations Issued but Not Yet Adopted

The Company anticipates that the application of the above new and revised standards, amendments and interpretations will have no material impact on its results and financial position. Disclosure changes are anticipated.

Certain new and amended accounting standards and interpretations have been published that are not mandatory for the December 31, 2025, reporting period and have not been early adopted by the Company.

IFRS 18, Presentation and Disclosures in Financial Statements ("IFRS 18")

This is a new standard on presentation and disclosure in financial statements which replaces IAS 1, with a focus on updates to the statement of profit or loss. IFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss;
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements; and
- improve aggregation and disaggregation.

An entity is required to apply IFRS 18 for annual reporting periods on or after January 1, 2027, with earlier adoption permitted. IFRS 18 requires retrospective application with specific transition provisions. The Company is assessing the impact of this amendment.

Other new standards and interpretations with future effective dates are either not applicable or not expected to have a significant impact on the Company's financial statements.

(l) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

Sitka Gold Corp.

Notes to the Consolidated Financial Statements
For the Quarter Ended March 31, 2026
(Expressed in Canadian dollars)

3. Material accounting policy information (continued)

(m) Valuation of equity units issued in private placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component. The fair value of common shares issued in private placements was determined to be the more easily measurable component and are valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, is allocated to the attached warrants. Any fair value attributed to warrants is recorded to reserves.

The Company's cash equivalents consist of Guaranteed Investment Certificates (GICs) which can be redeemed at any time. As at March 31, 2026, the GICs bear variable interest rate at average of 2.25% (2025 – 2.63%) per annum.

5. Prepaids

During the quarter ended March 31, 2026, the Company made prepayments for exploration costs, administration fees and market consultation services. The balance of prepaids is as follows:

6. Exploration and evaluation assets (continued)

The Company has now completed all the exploration requirements and has made all property cash and share payments pursuant to the RC option agreement and the amended agreement to acquire a 100% interest in the Property.

(e) Clear Creek property, Yukon

In June 2024, the Company entered into an asset purchase agreement with Victoria Gold Corp. in connection with the acquisition of a 100% interest in the Clear Creek property (the "Property"). The asset purchase agreement provides the Company with the option to either complete the acquisition by completing deferred payments and granting a royalty as described below, or terminate the asset purchase agreement in which case the Company is not required to make the remaining payments. Accordingly, the asset purchase agreement is referred to below as the "Option Agreement" and Victoria Gold Corp. is referred to as the "Optionor".

Pursuant to the Option Agreement, the Company issued to Optionor an aggregate of 21,843,401 common shares (issued) as an initial payment.

In order to complete the Acquisition, the Company is required to make the following additional payments (each a "Deferred Payment"):

- (i) \$2,000,000 on or before August 30, 2025 (shares issued in lieu of cash);
- (ii) \$3,000,000 on or before June 24, 2026; and
- (iii) \$6,000,000 on or before June 24, 2027.

Pursuant to the option agreement, the Company also made a Surety Bond Payment of \$184,646 to the Optionor (paid), being an amount equal to the cash bond in place with the applicable Governmental Authority for reclamation obligations on the Property.

During the term of the Option Agreement while the Deferred Payments are pending, the Company will act as operator of the Clear Creek Property and have control over its work program. The Company may, in its sole discretion, satisfy any Deferred Payment in cash or through the issuance of such number of shares as is equal to the amount of the applicable Deferred Payment based on the volume weighted average price of the shares on the TSX Venture Exchange for the 20 consecutive trading days immediately prior to the due date of the applicable Deferred Payment, provided however that in the event that any such share issuance would result in the Optionor holding greater than 19.9% of the issued and outstanding shares of the Company, the Company must first obtain:

- (i) the written consent of the Optionor to receive such shares; and
- (ii) approval of the shareholders of the Company in accordance with Exchange policies.

As additional consideration, upon completion of the Acquisition, the Company will grant to the Optionor a 5.0% net smelter return royalty on the Property (the "NSR Royalty"). The Company shall have the right at any time following the grant of the NSR Royalty to purchase from the Optionor 60% of the NSR Royalty by way of a one-time cash payment of \$10,000,000.

In the event that the Company publicly delineates proven and probable mineral reserves of 2,000,000 ounces or more of gold or gold equivalent on the Property, then the Company shall make an additional payment of \$10,000,000 in cash to the Optionor within 60 business days of such public delineation. In the event that the Company has not made such public delineation before the fifth anniversary of the Option Agreement, then the Optionor shall have the right to cause an evaluation by an independent qualified person to be conducted as to the extent of the mineral resources on the Property, and, in the event such qualified person determines the existence of measured and/or indicated resources of 2,000,000 ounces or more of gold or gold equivalent on the Property, then the Company shall make the \$10,000,000 cash payment to the Optionor within 60 business days.

6. Exploration and evaluation assets (continued)

In connection with the Option Agreement, the parties have entered into an investor rights agreement pursuant to which, among other things:

- (i) at any time in which the Optionor shall have beneficial ownership of at least 15% of the issued and outstanding Shares of the Company, the Optionor shall have the right to nominate one director to the board of directors of the Company; and
- (ii) the Optionor has been granted certain customary anti-dilution and registration rights.

The investor rights agreement was terminated on August 25, 2025 due to the Optionor's shareholding in the Company decreasing below 5% for a continuous period of 30 days.

On August 14, 2024, the Ontario Superior Court of Justice issued an order appointing PricewaterhouseCoopers ("PwC") as receiver over the assets and undertakings of Victoria Gold Corp., including the Option Agreement. PwC confirmed to the Company, on a with prejudice basis, that it would not seek to disclaim the Option Agreement nor would it seek to sell the Clear Creek (Victoria Gold) Property free and clear of the Option Agreement. The Option Agreement remains in full force and effect as between the Company and Victoria Gold Corp.

10. Capital management

Management's objective is to manage its capital to ensure that there are adequate capital resources to safeguard the Company's ability to continue as a going concern through the optimization of its capital structure. The capital structure consists of share capital and working capital. In order to achieve this objective, management makes adjustments to it in light of changes in economic conditions and risk characteristics of the underlying assets. To maintain or adjust capital structure, management may invest its excess cash in interest bearing accounts of Canadian chartered banks and/or raise additional funds externally as needed. The Company is not subject to externally imposed capital requirements. The Company's management of capital did not change during the quarter ended March 31, 2026.

11. Financial instruments

The Company is exposed in varying degrees to a variety of financial instrument related risks by virtue of its activities. The overall financial risk management program focuses on preservation of capital, and protecting current and future Company assets and cash flows by reducing exposure to risks posed by the uncertainties and volatilities of financial markets.

The types of risk exposure and the way in which such exposures are managed are as follows:

Credit Risk - The Company's credit risk is primarily attributable to its liquid financial assets. The Company's primary exposure to credit risk is on its cash. Cash are held with the same financial institution giving rise to a concentration of credit risk. This risk is managed by using a major Canadian bank that is a high credit quality financial institution. Credit risk is assessed as low.

Liquidity Risk - Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements. Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding. All of the Company's financial liabilities are due within a year. Liquidity risk is assessed as high.

Interest rate risk - Interest rate risk refers to the risk that fair values of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk as cash earns interest income at variable rates. The fair value of cash is minimally affected by changes in short term interest rates.

(Expressed in Canadian dollars)

11. Financial instruments (continued)

Foreign currency risk - Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is exposed to foreign currency risk to the extent that certain monetary financial instruments and other assets are denominated in United States dollars. The Company has not entered into any foreign currency contracts to mitigate this risk, as it believes this risk is minimized by the minimal amount of cash held in United States funds.

Commodity price risk - The value of the Company's mineral resource properties is related to the price of various commodities and the outlook for them. Commodity prices have historically fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, industrial retail demand, central bank lending, forward sales by producers and speculators, level of worldwide production and short-term changes in supply and demand.

Fair Value - The Company only has cash and cash equivalents at fair value.

The carrying amounts of the Company's financial instruments approximate their fair due to their short period of time until maturity.

IFRS 13, Fair-Value Measurement, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).
