FORWARD LOOKING STATEMENTS

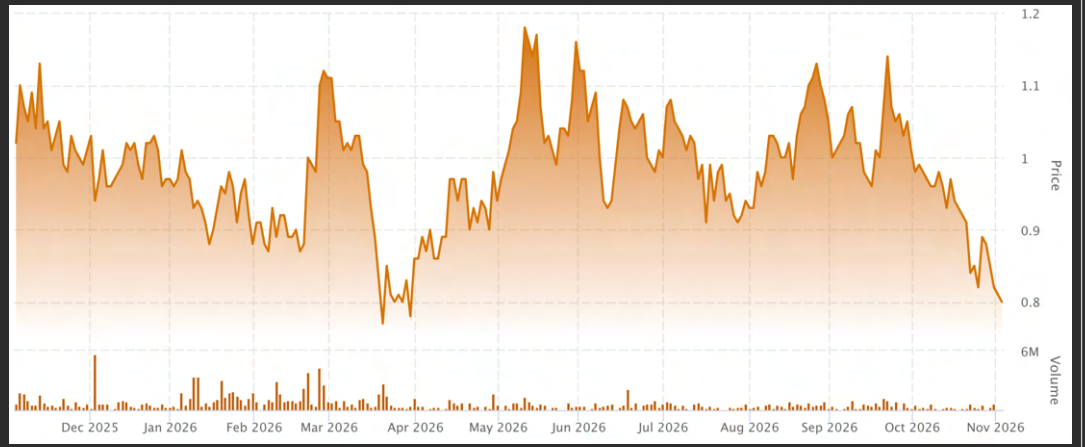

This Presentation contains forward-looking statements that involve risks and uncertainties, which may cause actual results to differ materially from the statements made. When used in this document, the words "may", "would", "could", "will", "intend", "plan", "anticipate", "believe", "estimate", "expect" and similar expressions are intended to identify forward-looking statements. Such statements reflect our current views with respect to future events and are subject to such risks and uncertainties. Many factors could cause actual results to differ materially from the statements made, including those factors discussed in filings made by us with the Canadian securities regulatory authorities. Should one or more of these risks and uncertainties, such as results of current exploration programs, the general risks associated with the mining industry, the price of gold and other metals, currency and interest rate fluctuations, increased competition and general economic and market factors, occur or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, or expected. We do not intend and do not assume any obligation to update these forward-looking statements. Potential shareholders are cautioned not to put undue reliance on such forward-looking statements.

LEADERSHIP, MANAGEMENT & ADVISORS

MANAGEMENT

Cor Coe
Director & CEO
B.SC., P.GEO.

35+ yrs in mining (Arizona, Nevada, Yukon). Put 2 mines into production; credited with discovery of a 2.0 M oz Au deposit. Raised > $100 M for Sitka. 2025 Yukon Prospector of the Year Award.

Donald Penner
Director & President
B.SC.

Geologist with expertise in Grassroots to Feasibility stage projects in N/S America, Africa & Europe since 1969.

Stephen Pearce
Director & CFO
LL.B.

Lawyer and corporate finance professional specializing in securities, governance and resource companies, serving as a director and officer of multiple public issuers.

Mike Burke
Director & VP Corp. Dev.
B.SC., P.GEO.

Professional Geologist with +35 years experience in Yukon. 21 years as Head of Mineral Services, Yukon Geological Survey.
Experience in mineral exploration, open pit and underground mining.

Gilles Dessureau
VP Exploration
M.SC., P.GEO.

Professional Geologist with 15+ yrs experience in the Yukon. 20 + years experience in mineral exploration including underground mining,
former VP Exploration for Fireweed Metals

Scott Price
Operations Manager (USA)
B.SC., M.SC.

25 yrs in gold exploration, specializing in CarlinNevada.
Worked on the Pebble deposit in Alaska.

BOARD & ADVISORS

Tim Termuende
NON-EXECUTIVE CHAIR, P.Geo.

Professional Geologist, Executive Chairman and Co-founder of Eagle Plains Resources with 40+ years of mineral and value creation experience.

Caroline Hendrick
INDEPENDENT DIRECTOR, JD

Corporate and securities lawyer at DuMoulin Black, advising public companies on capital markets, governance, financings, mergers and acquisitions.

Louis Archambeault
INDEPENDENT DIRECTOR, M.Eng.

Mining engineer (M.Eng) and senior mining executive with 20+ years of experience in corporate development, capital markets, M&A and strategy, including Goldcorp and Orezone Gold.

Samantha Shorter
INDEPENDENT DIRECTOR, CPA

CPA with 19 years of mining-focused audit, compliance and executive finance experience, including international operations in Brazil and Mexico.

Angus Campbell
INDEPENDENT DIRECTOR, B.Sc.

Geologist with 30+ years of global exploration experience, including leading discovery and resource growth at Sabina Gold before its $1.2 billion sale to B2Gold.

Dr. Craig Hart
ADVISOR, P.Geo

Chairman of Snowline Gold and former Director of UBC's Mineral Deposit Research Unit (MDRU). A founding geologist with the Yukon Geological Survey, with 40+ Yukon field seasons and recognized expertise in reduced intrusion-related gold systems.

Sam Wallingham
ADVISOR, NND Member

Community affairs and First Nations engagement specialist with 25+ years of mining experience and advisor to the new Na-Cho Nyäk Dun (NND) Chief and Council.

Brad Thrall
ADVISOR, M.Sc.

Metallurgical engineer with 35+ years of mining experience, including co-founder and President of Alexco Resources prior to its acquisition by Hecla Mining.

Scott Close
ADVISOR, M.Sc., P.Geo.

Founder and President of Ethos Geological Inc., specializing in resource evaluation, structural geology and mineral discovery across North America.

Joe Piekenbrock
ADVISOR, M.Sc.

Exploration geologist with 35+ years of global experience, including leadership roles at NovaGold and major discoveries such as Donlin Creek and Pebble.*M.Sc. Ex-VP Ex Nova Gold; Donlin Creek discovery.*

PORTFOLIO

SITKA GOLD

*Sitka's flagship **RC Gold Project** is located in Yukon, Canada. This year the company plans to double the total drilling completed to date with a 60k m drill campaign. On March 12th 2026, Sitka announced plans to spin out its other properties - **Alpha Gold in Nevada and Burro Creek in Arizona,** in order to maximize value to shareholders and continue expanding the gold resource at RC Gold.*

FLAGSHIP

RC GOLD

3 deposits · 447 km²
Yukon, Canada

*** Please refer to slide 40, "Burro Creek – Historical Resource".*

THE TOMBSTONE GOLD BELT

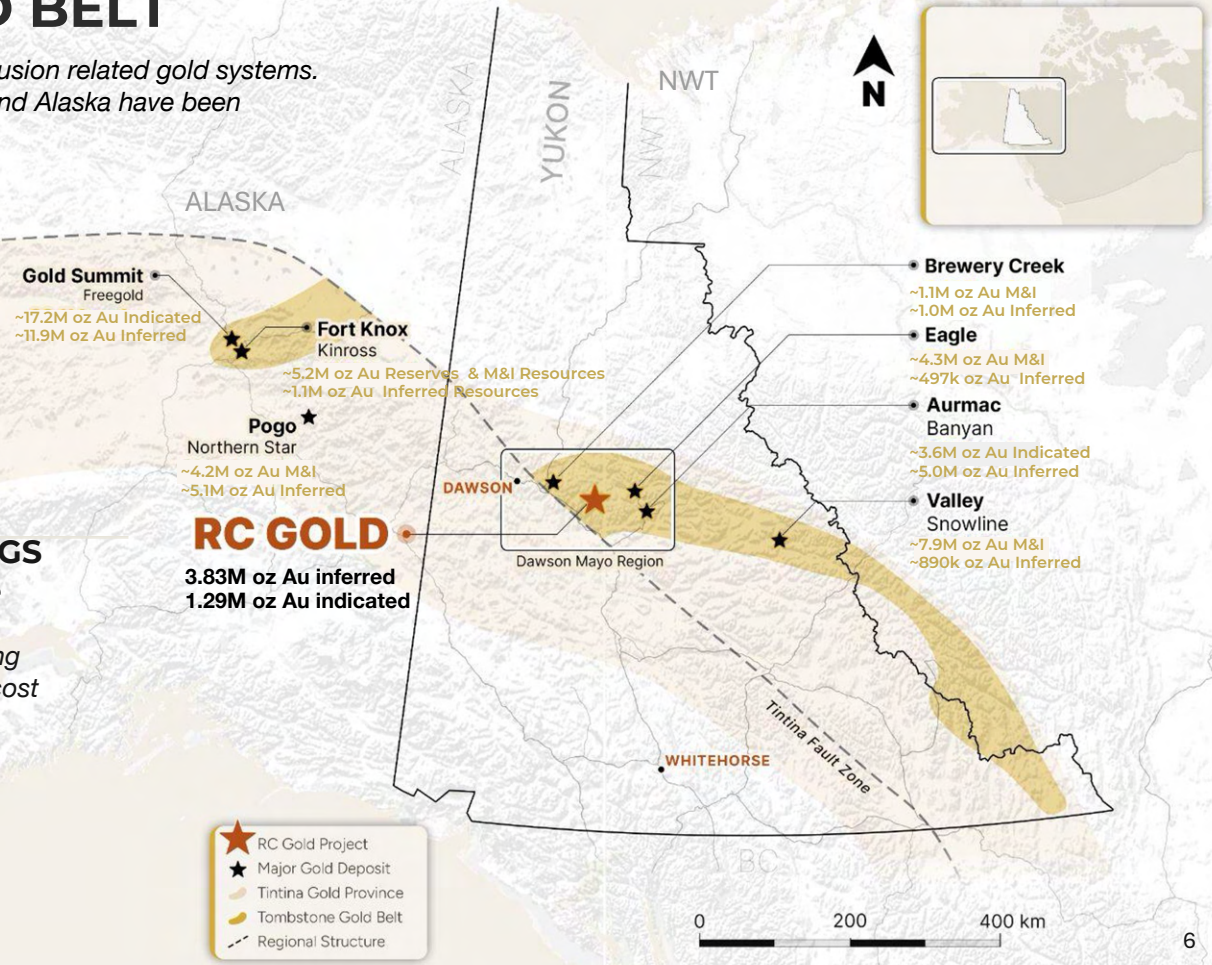

An emerging prolific gold district hosting reduced intrusion related gold systems. Several multi-million ounce resources across Yukon and Alaska have been discovered in recent years.

THE TOMBSTONE GOLD BELT HOSTS REDUCED INTRUSION-RELATED GOLD SYSTEMS (RIRGS)

*A deposit style first recognized in the 1990s — following the discovery of **Fort Knox Mine** (in production since 1996) RIRGS deposits are now **sought globally***

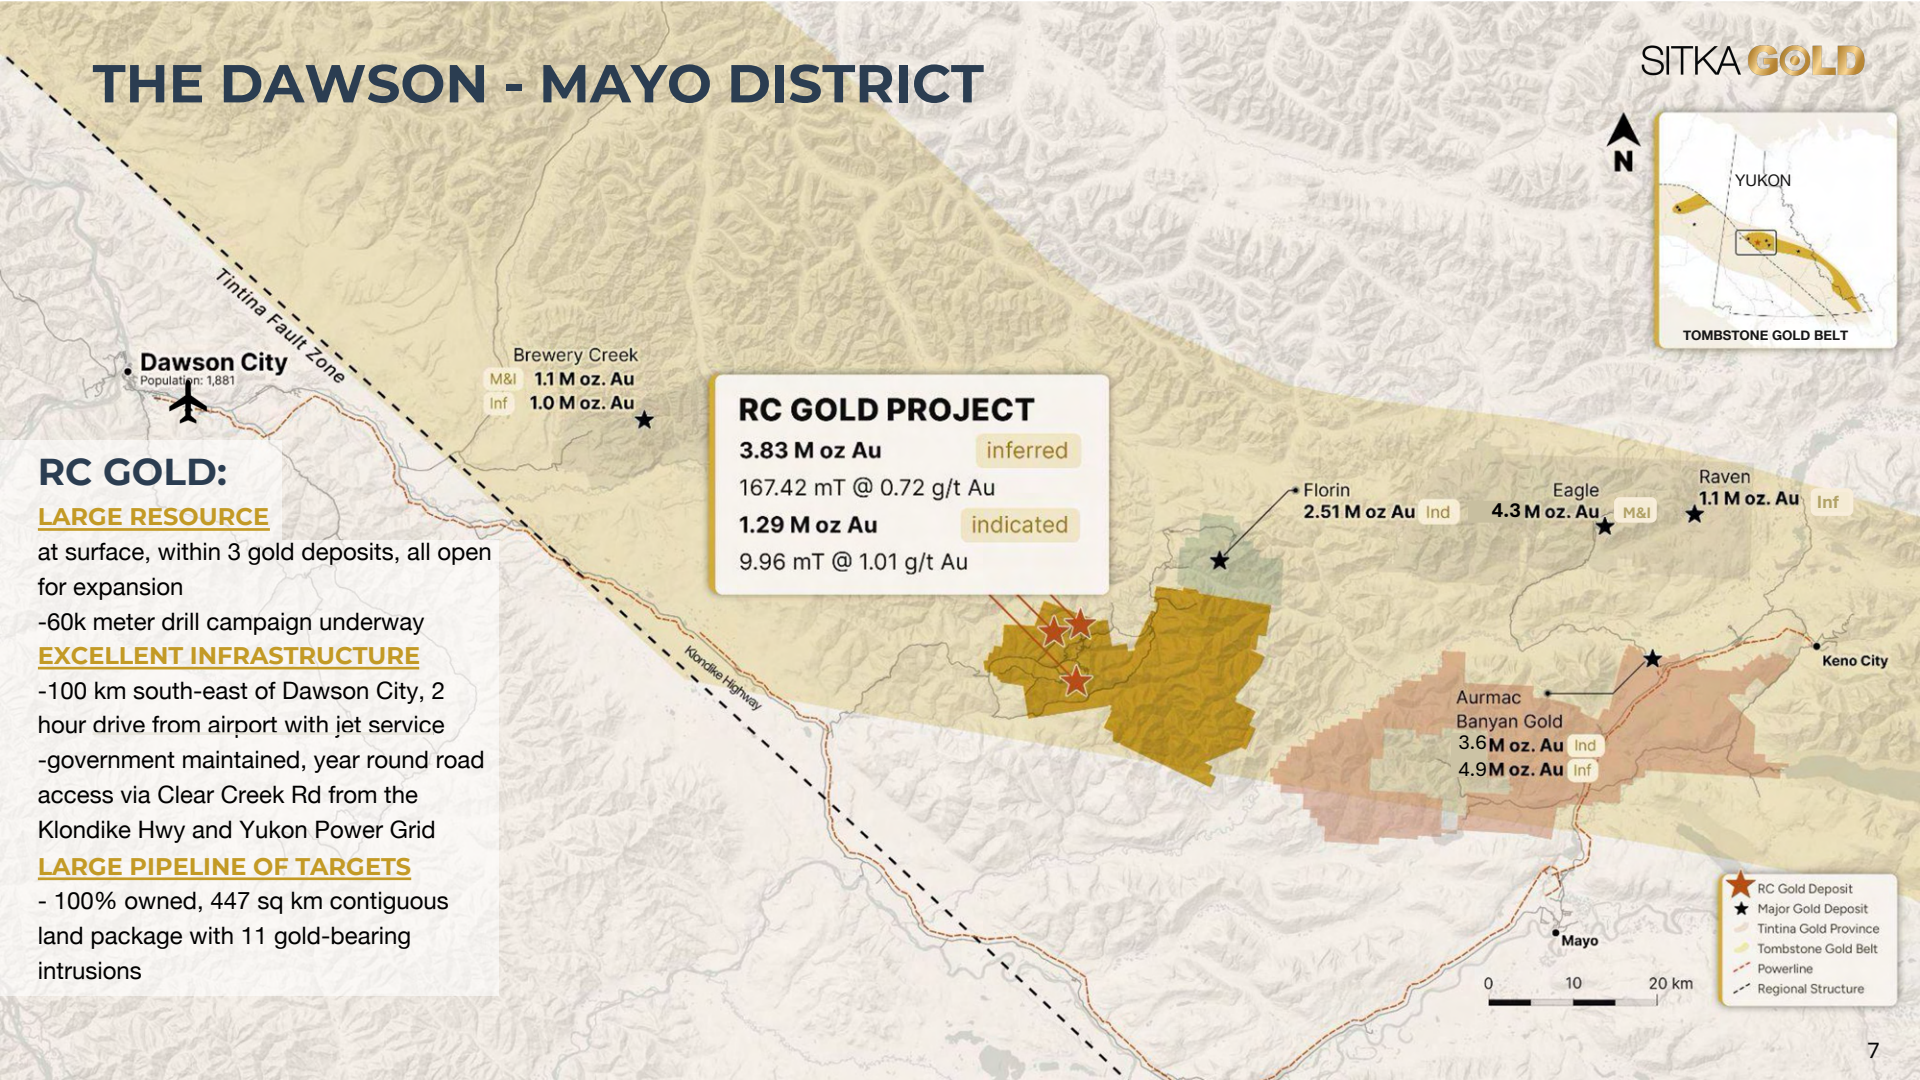

KEY STRATEGIC ADVANTAGES OF RIRGS

- ***Predictable geology** — supporting rapid resource growth*
- ***Uniform metallurgy** — enabling simpler processing*
- ***Near-surface mineralization** — suitable for low-cost open-pit mining*
- ***Low discovery cost per ounce***

THE DAWSON - MAYO DISTRICT

SITKA GOLD

RC GOLD:

LARGE RESOURCE

at surface, within 3 gold deposits, all open for expansion

-60k meter drill campaign underway

EXCELLENT INFRASTRUCTURE

-100 km south-east of Dawson City, 2 hour drive from airport with jet service

-government maintained, year round road access via Clear Creek Rd from the Klondike Hwy and Yukon Power Grid

LARGE PIPELINE OF TARGETS

- 100% owned, 447 sq km contiguous land package with 11 gold-bearing intrusions

FAVOURABLE ACCESS TO INFRASTRUCTURE

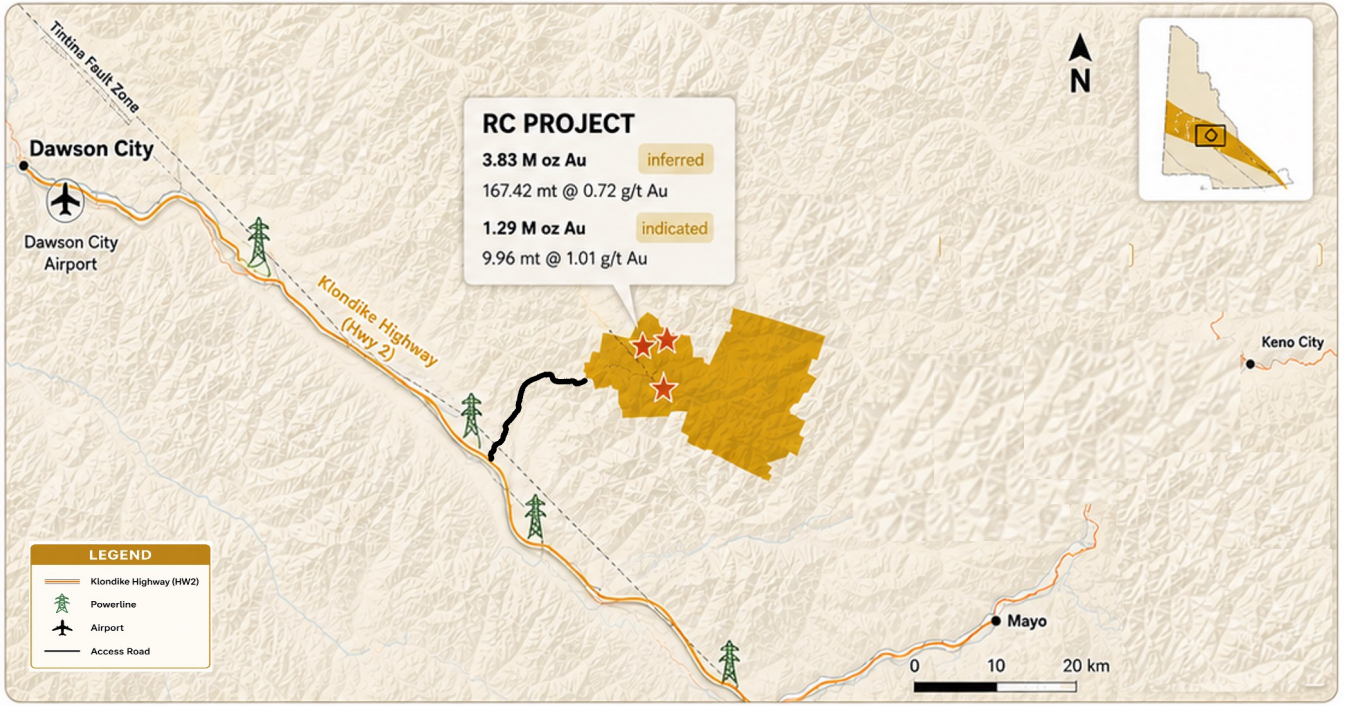

SITKA GOLD

LOCATION:
2 hour drive from Dawson City – home of the Klondike Gold Rush

AIRPORT:
Approximately 80km from an international airport with daily flights and freight capacity

ROAD ACCESS:
Year-round road access via the Klondike highway and well-maintained local roads to site

POWER:
Powerlines follow the Klondike Hwy with access approx. 32km from site

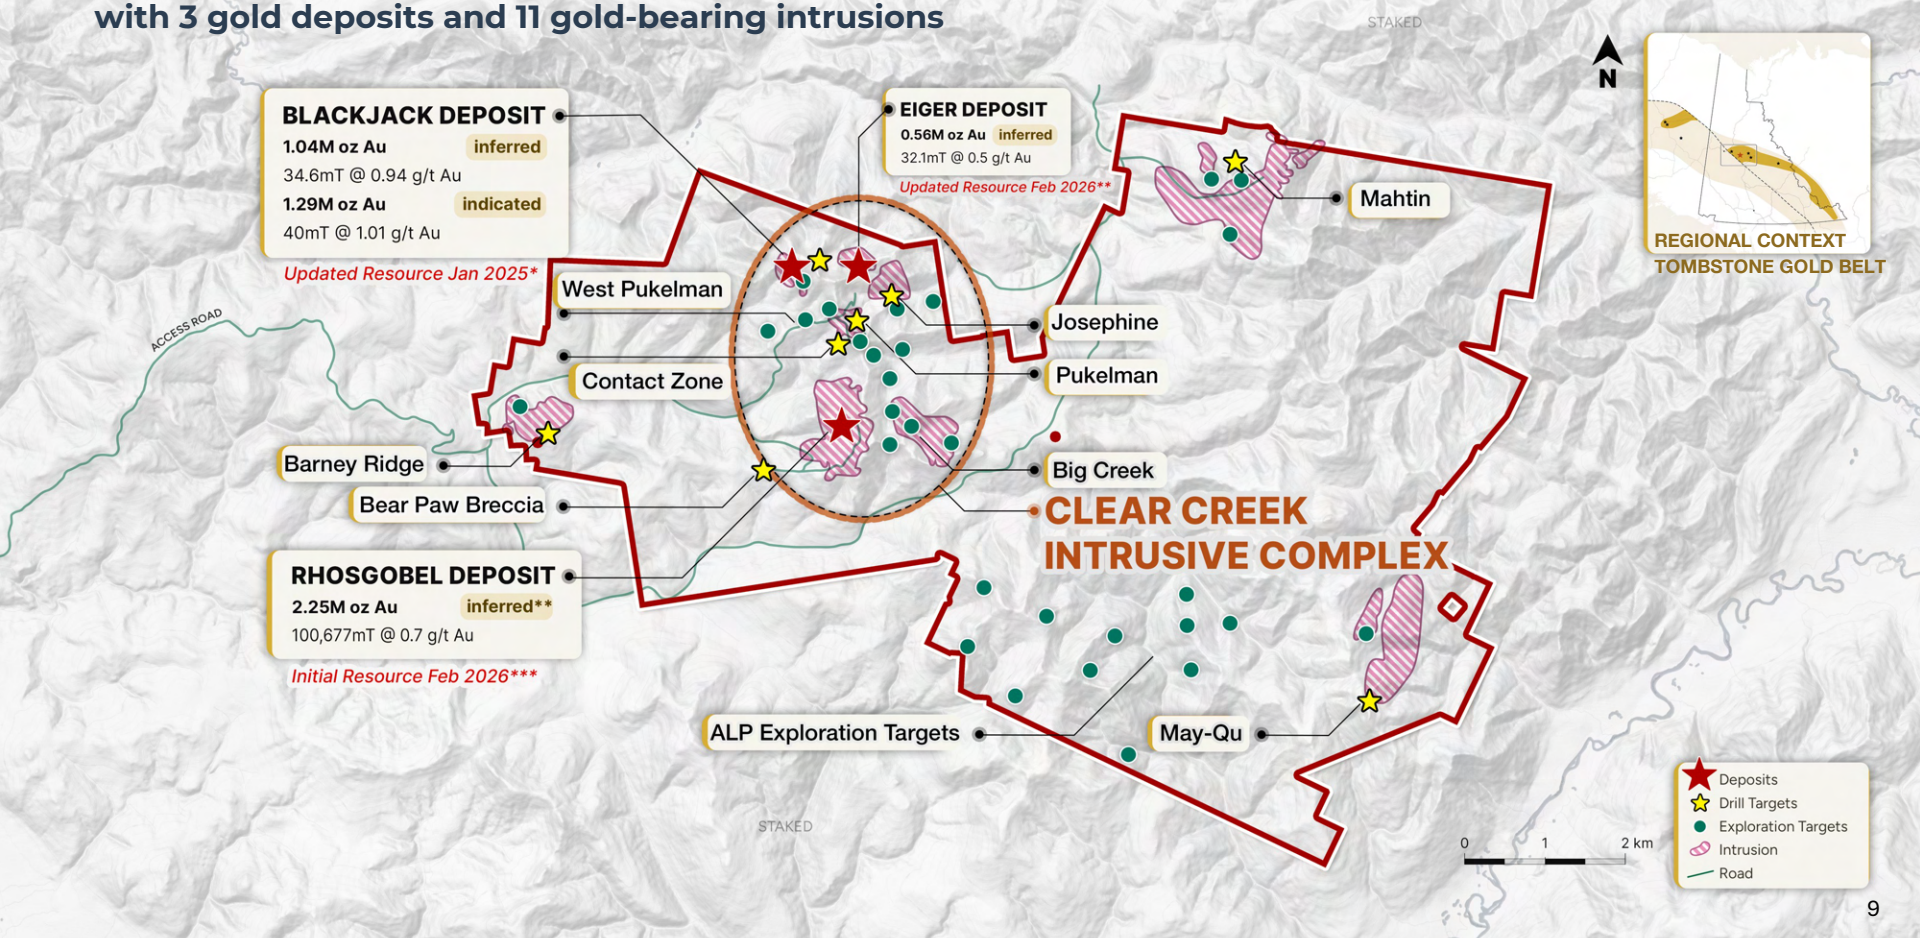

SITKA'S FLAGSHIP RC GOLD PROJECT

100% owned, road-accessible, 447 sq km contiguous land package with 3 gold deposits and 11 gold-bearing intrusions

SITKA GOLD

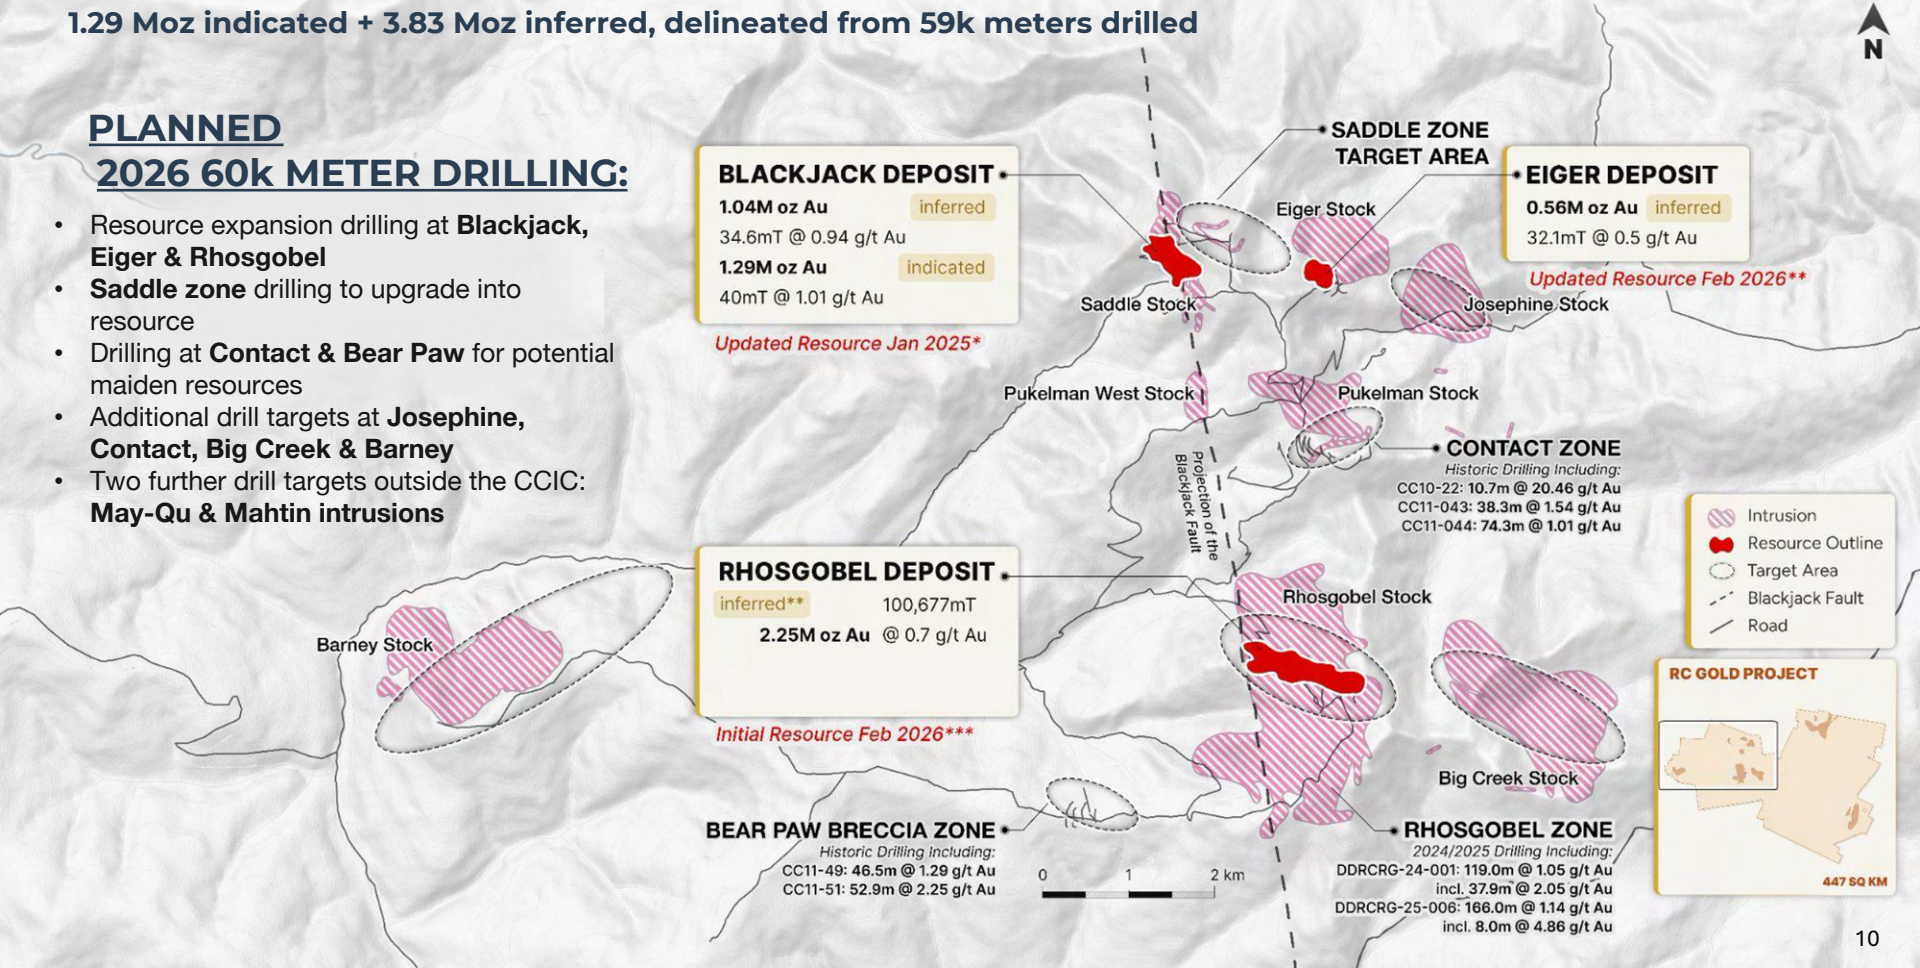

THREE GOLD DEPOSITS & GROWING

1.29 Moz indicated + 3.83 Moz inferred, delineated from 59k meters drilled

SITKA GOLD

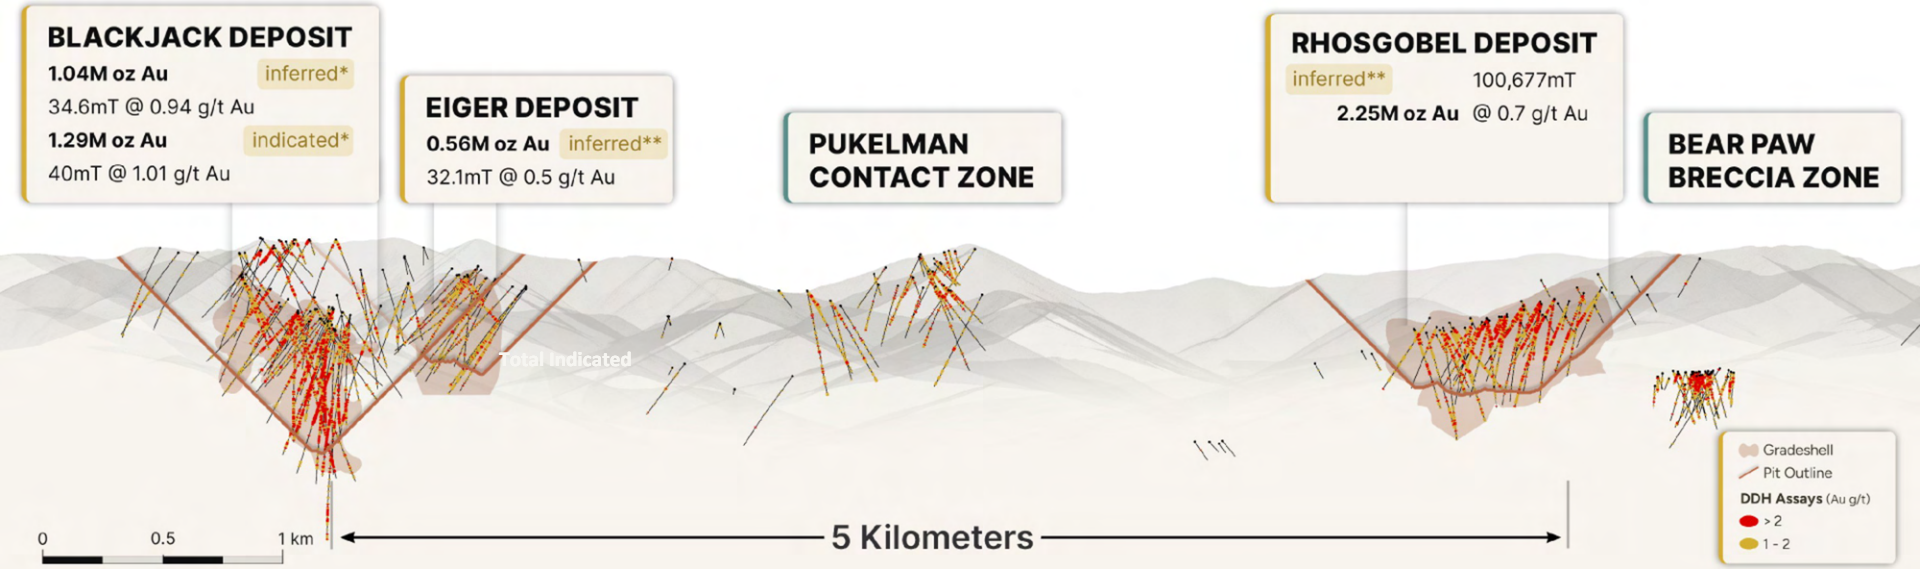

PLANNED 2026 60k METER DRILLING:

- Resource expansion drilling at **Blackjack, Eiger & Rhosgobel**
- **Saddle zone** drilling to upgrade into resource
- Drilling at **Contact & Bear Paw** for potential maiden resources
- Additional drill targets at **Josephine, Contact, Big Creek & Barney**
- Two further drill targets outside the CCIC: **May-Qu & Mahtin intrusions**

CURRENT PIT-CONSTRAINED GOLD RESOURCES

SITKA GOLD

Total Inferred		**167,423**	0.72	3,829

2026 PLANNED 60,000 METER DIAMOND DRILL PROGRAM

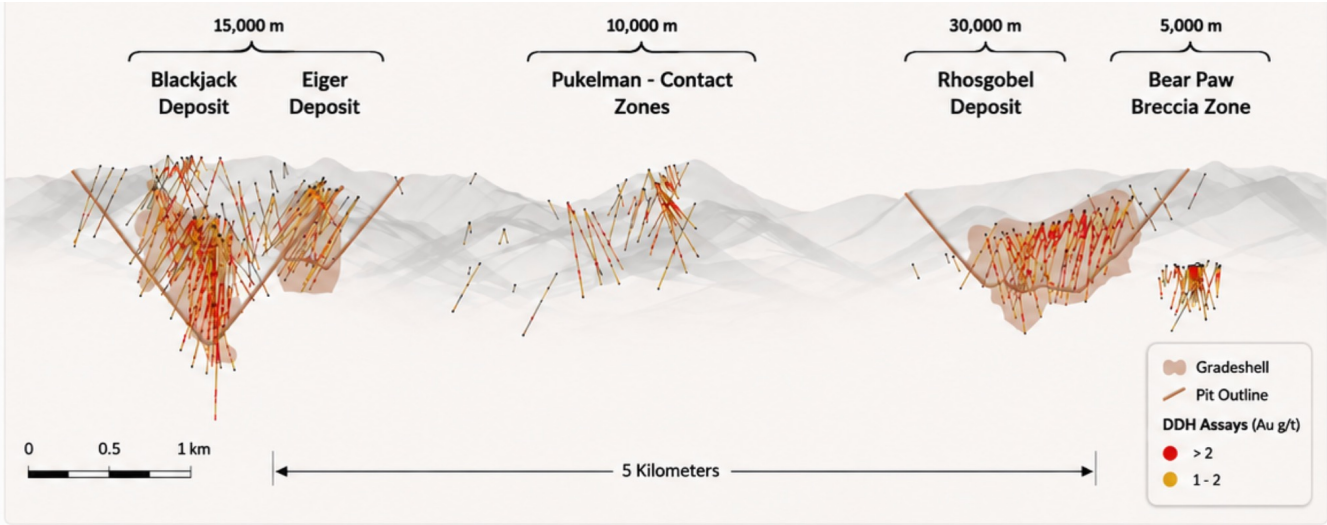

BLACKJACK DEPOSIT:
Target near-surface resource expansion to the north and east while testing mineralized continuity at depth.

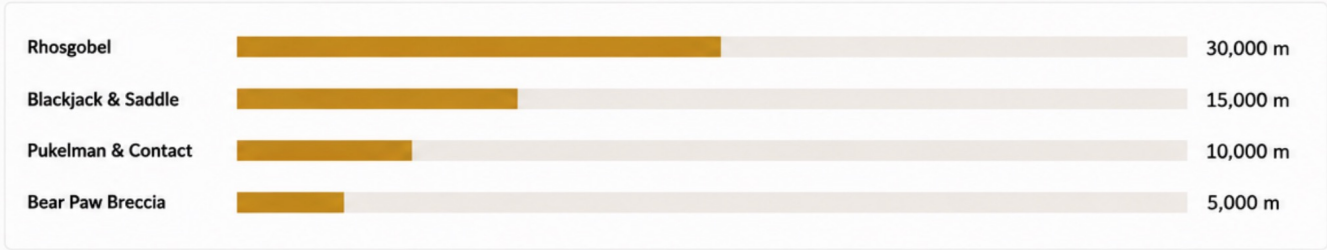

RHOSGOBEL DEPOSIT:
Step-out drilling to test the limits of this unconstrained system across all lateral directions and at depth.

EIGER:
Drill to expand the known footprint and evaluate emerging higher-grade zones at depth.

BEAR PAW:
Conduct exploratory drilling to step out beyond historical limits and define a maiden Mineral Resource Estimate.

PUKELMAN-CONTACT:
Additional drilling to confirm structural continuity and establish a maiden Mineral Resource Estimate

SITKA GOLD

CAMP #1

CAMP #2

KLUANE DRILLING

RHOSGOBEL DEPOSIT

SITKA GOLD

Drilling as of September 8, 2026

Maiden resource announced February 2026
based on 15,396 m totaling 72 holes

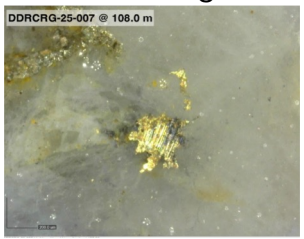

0.3 g/t cut-off grade = 2.25 M oz Au @ 0.7 g/t Au
0.6 g/t cut-off grade = 1.5 M oz Au @ 1.02 g/t Au

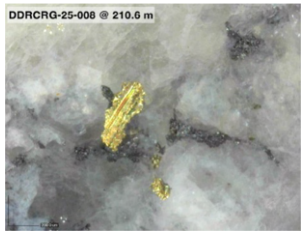

Discovery drill program intersected > 1 g/t gold starting at surface in the eastern portion of the deposit

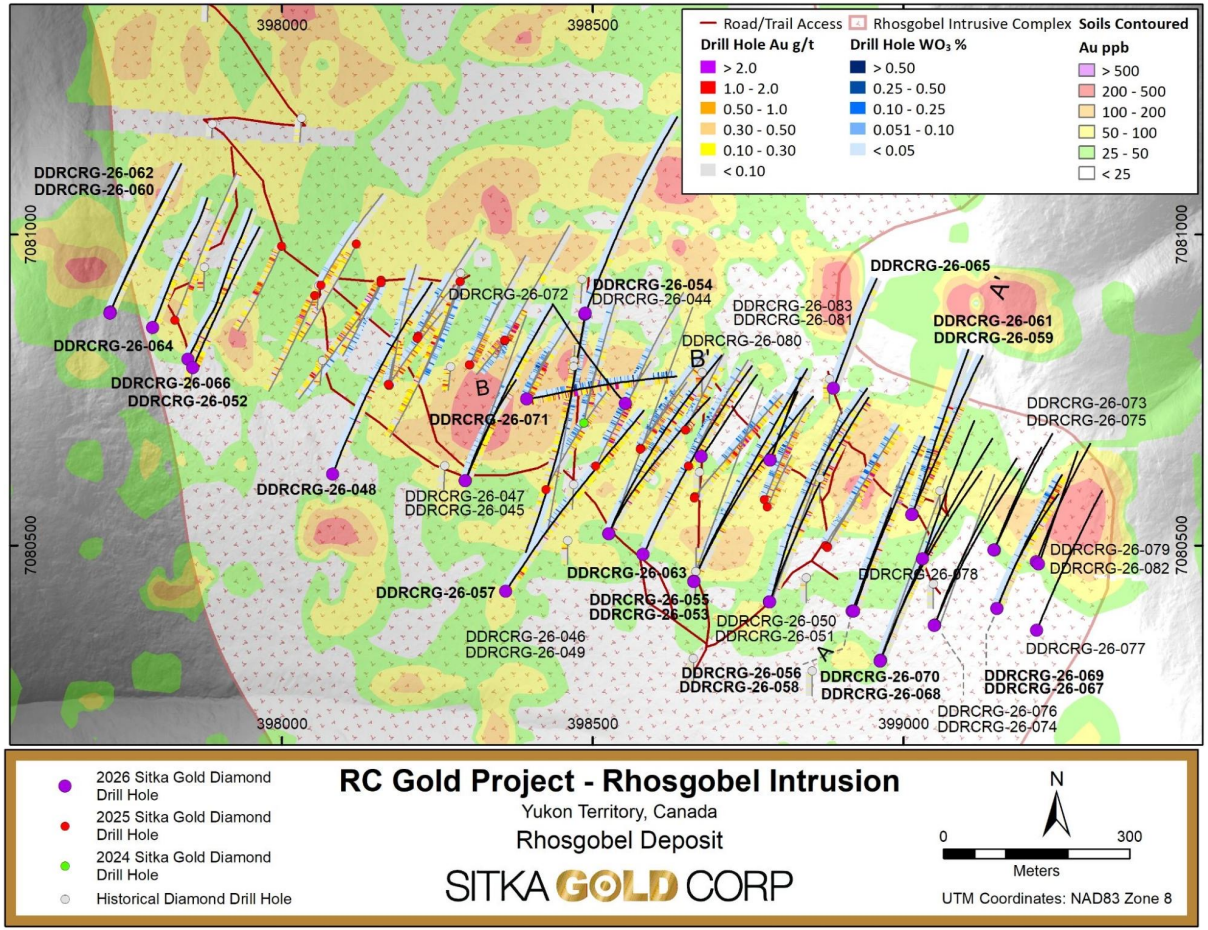

- Discovery hole 24-01 intersected **119.0 m of 1.05 g/t Au**, including 37.9 m of 2.05 g/t Au

- Hole 25-06 intersected **116m @ 1.14 g/t Au** starting at 3.1m.

- Hole 26-071 intersected **256.9m od 0.84 g/t Au** from surface including **159.2 m of 1.14 g/t Au**

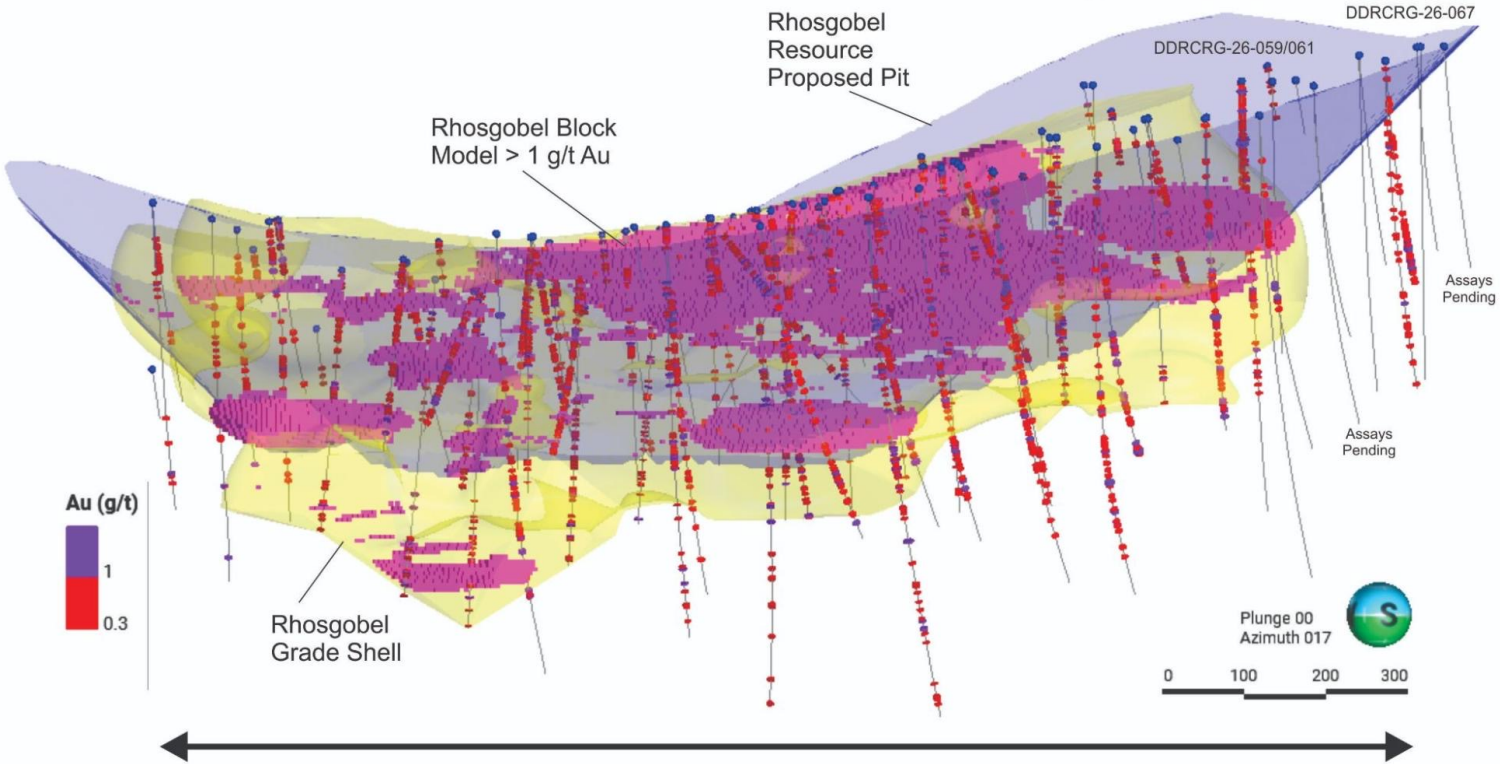

SITKA GOLD CORP

RC GOLD PROJECT - RHOSGOBEL DEPOSIT

Drilling as of September 8, 2026

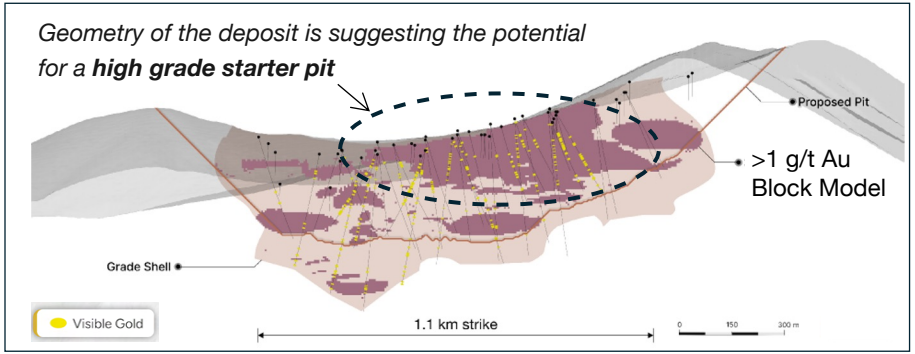

Cross Section Looking North Showing > 1g/t Au block model and grade shell

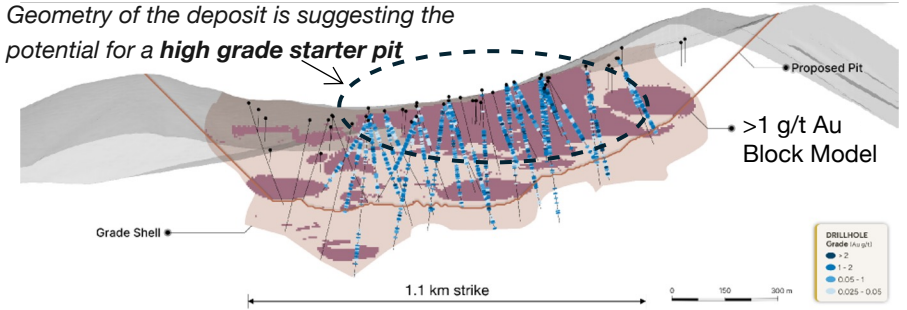

RHOSGOBEL RESOURCE SENSITIVITY TO CHANGING CUT-OFF GRADES

CUT-OFF (G/T AU)	TONNES (000'S)	AU (G/T)	OZ AU (000'S)
0.2	129,683	0.6	2,481
0.25	115,106	0.64	2,380
0.30 Base case	**100,677**	**0.7**	**2,250**
0.35	89,620	0.74	2,135
0.4	78,687	0.79	2,004
0.45	68,714	0.85	1,867
0.5	59,768	0.9	1,731
0.55	51,451	0.96	1,591
0.6	44,883	1.02	1,470

1. Bolded row represents the base case for the mineral resource estimate.
2. Cut-off grades as low as 0.2 g/t Au are still considered to have Reasonable Prospects for Eventual Economic Extraction.

BLACKJACK DEPOSIT –SADDLE ZONE

SITKA GOLD

Cross Section DDRCCC-26-133:

2026 Drill Plan:

BLACKJACK DEPOSIT – SADDLE ZONE

Higher-grade intrusive gold system with strong expansion potential at depth and near surface. Saddle Zone drilling to convert in-pit waste to mineral resources.

SITKA GOLD

RAPIDLY ADVANCING DISCOVERY
Blackjack is a rapidly advancing intrusive gold discovery within the RC Gold Project.

IMPROVING CONTINUITY AT DEPTH
Drilling has identified broad zones of mineralization with improving continuity at depth.

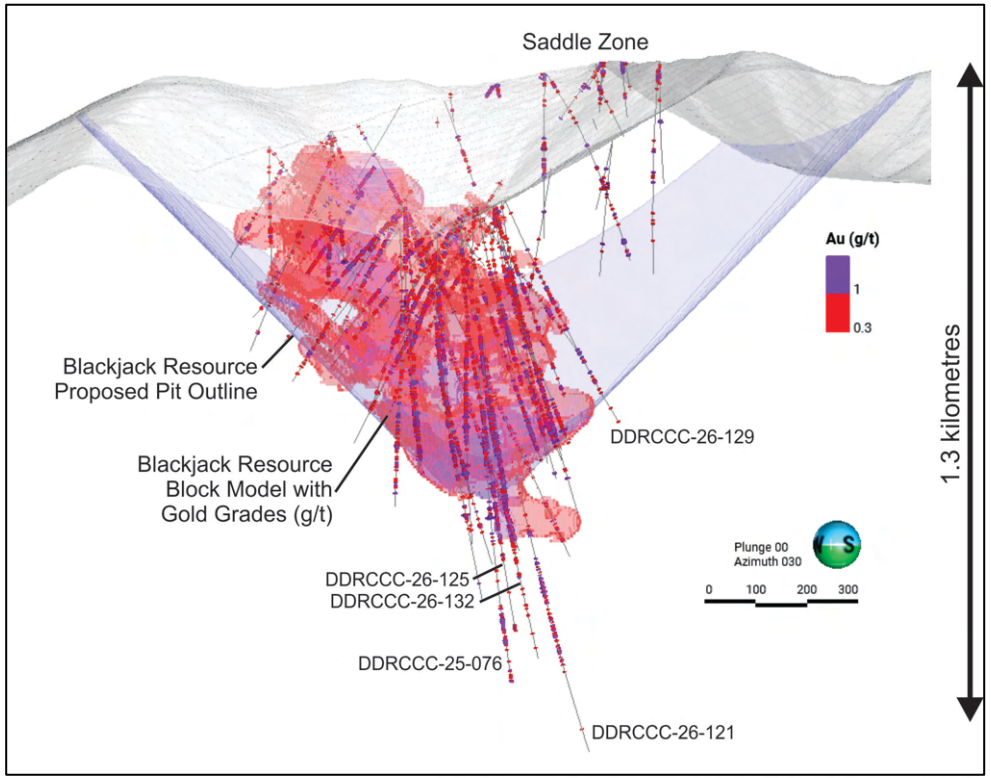

HIGHER-GRADE CORE EMERGING
Higher-grade domains appear to strengthen within deeper portions of the system.

STRONG DEPTH POTENTIAL
Mineralization remains open at depth with limited deep drilling completed to date.

258 g*m	21 holes / 7,077 m	OPEN AT DEPTH
Highest discovery intercept	Initial discovery program	Strong vertical continuity

Blackjack demonstrates the scale, continuity, and depth potential characteristic of major intrusive gold systems.

RC GOLD PROJECT - BLACKJACK DEPOSIT
Long Section East-Northeast
Showing Au Block Model and Drilling

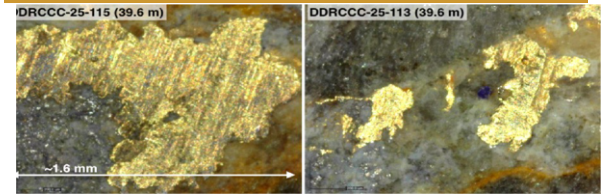

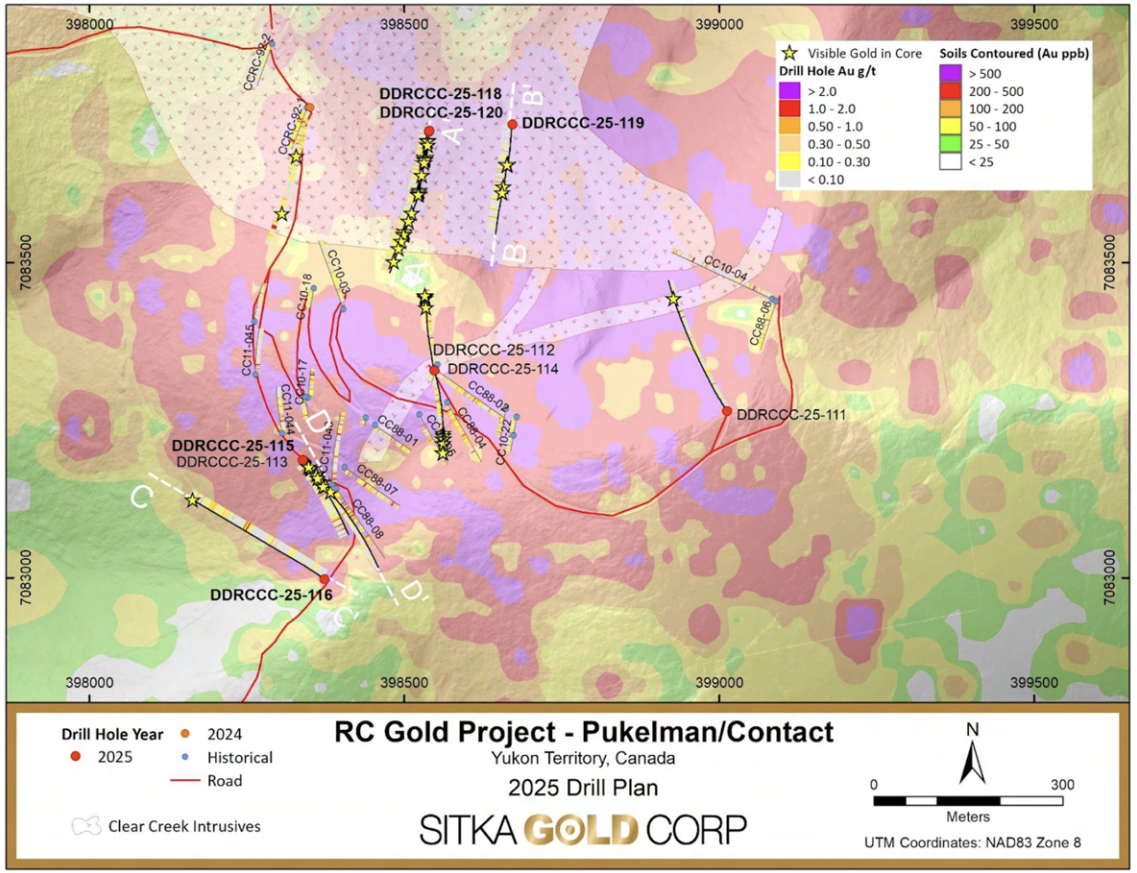

PUKELMAN/CONTACT ZONE

SITKA GOLD

DIAMOND DRILLING PUKELMAN-CONTACT DISCOVERY

- 2026 drilling of 10,000m to establish an initial Mineral Resource Estimate
- Sitka tested both intrusion and sediment hosted mineralization with diamond drilling in 2025
- Drill Hole DDRCCC-25-113 within adjacent metasediments intersected 119.0 m of 1.10 g/t Au *from surface.*
- Drilling intersected gold mineralization over a 900 m by 650 m area

POSITIVE INITIAL METALURGICAL TESTING

SITKA GOLD

Preliminary metallurgical test results indicate the deposits are amenable to conventional extraction methods.

94.3%

Gold Recovery

Average gold recovery from the Rhosgobel deposit using conventional whole ore cyanidation leaching at a grind size of 75 microns.

84.7%

Tungsten Recovery

Initial metallurgical testing returned tungsten recovery of 84.7% in rougher concentrate using conventional floatation with a very low mass pull of less than 1%.

2022

Blackjack + Eiger Deposits

- Cyanidation Bottle Roll Testing up to 94.1% Recovery
- Confirmed non-refractory characteristics

2025

Blackjack Deposits

- Conventional Cyanidation Leach
- Gravity Recovery + Gravity Tails Leach
- Gravity Recovery + Gravity Tails
- Floatation **up to 93.0% Recovery**

2026

Rhosgobel Deposit

- 94.3% gold recovery on whole ore cyanidation leaching @ 75 microns
- 84.7% tungsten recovery using floatation with low mass pull <1%

All Deposits

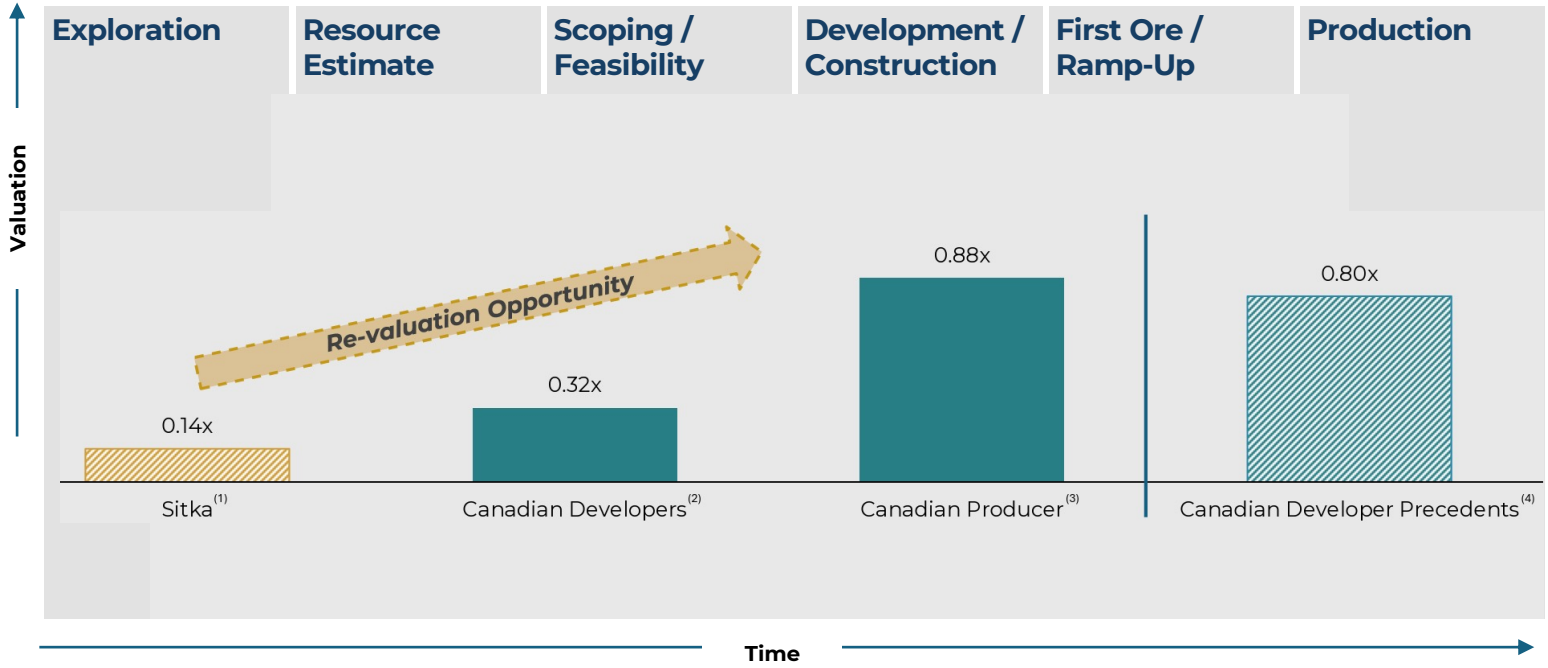

- Additional metallurgical studies ongoing

STRONG RE-RATE POTENTIAL AS SITKA ADVANCES

Recent acceleration of PwC agreement, ongoing 2026 60,000 m drill program at RV Gold and an updated MRE + PEA planned for early 2027

*With **3 gold deposits** open in all directions and **11 known gold-bearing intrusions**, Sitka's RC Gold Project is still **in the early stages of development***

Tier-1 gold assets like RC Gold are increasingly rare globally and command relative premiums, particularly during bull markets

Sources: ATB Cormark, public disclosures and S&P Capital IQ

(1) Sitka P/NAV multiple based on ATB Cormark Research estimates

(2) Canadian developers include Banyan, Talamore, Snowline, White Gold, TDG, Radisson, Scottie, Maple, Spanish Mt., and Gold X2

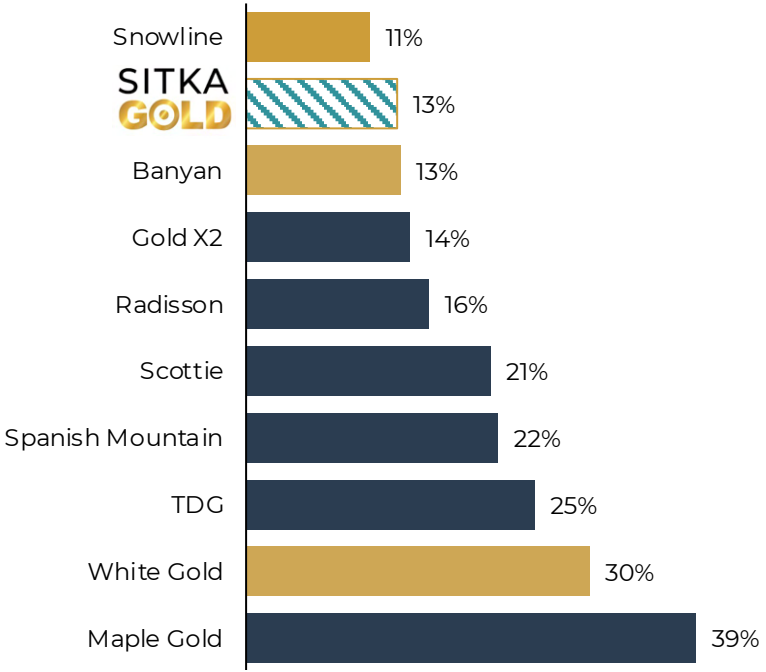

(3) Canadian producers includes Artemis and Wesdome

(4) Select Canadian developer precedents include transactions since 2025 with the target at a PEA stage or earlier; based on average P/NAV multiple of Fresnillo > Probe, Fuerte > Coffee, and IAMGOLD > Northern Superior

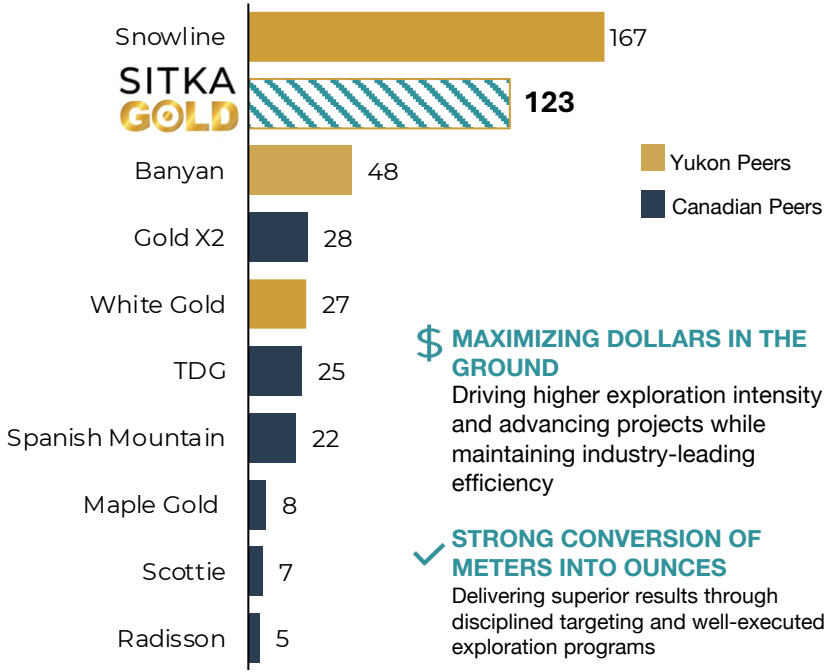

AMONG CANADA'S MOST EFFICIENT GOLD EXPLORATION COMPANIES

Disciplined, targeted exploration has enabled Sitka to delineate significant gold resources with relatively few metres drilled.

CORPORATE G&A vs. TOTAL EXPENSES (2020-2025; %)[1]

CONTAINED RESOURCE vs. METRES DRILLED (oz AuEq / m)[2]

MAXIMIZING DOLLARS IN THE GROUND

Driving higher exploration intensity and advancing projects while maintaining industry-leading efficiency

STRONG CONVERSION OF METERS INTO OUNCES

Delivering superior results through disciplined targeting and well-executed exploration programs

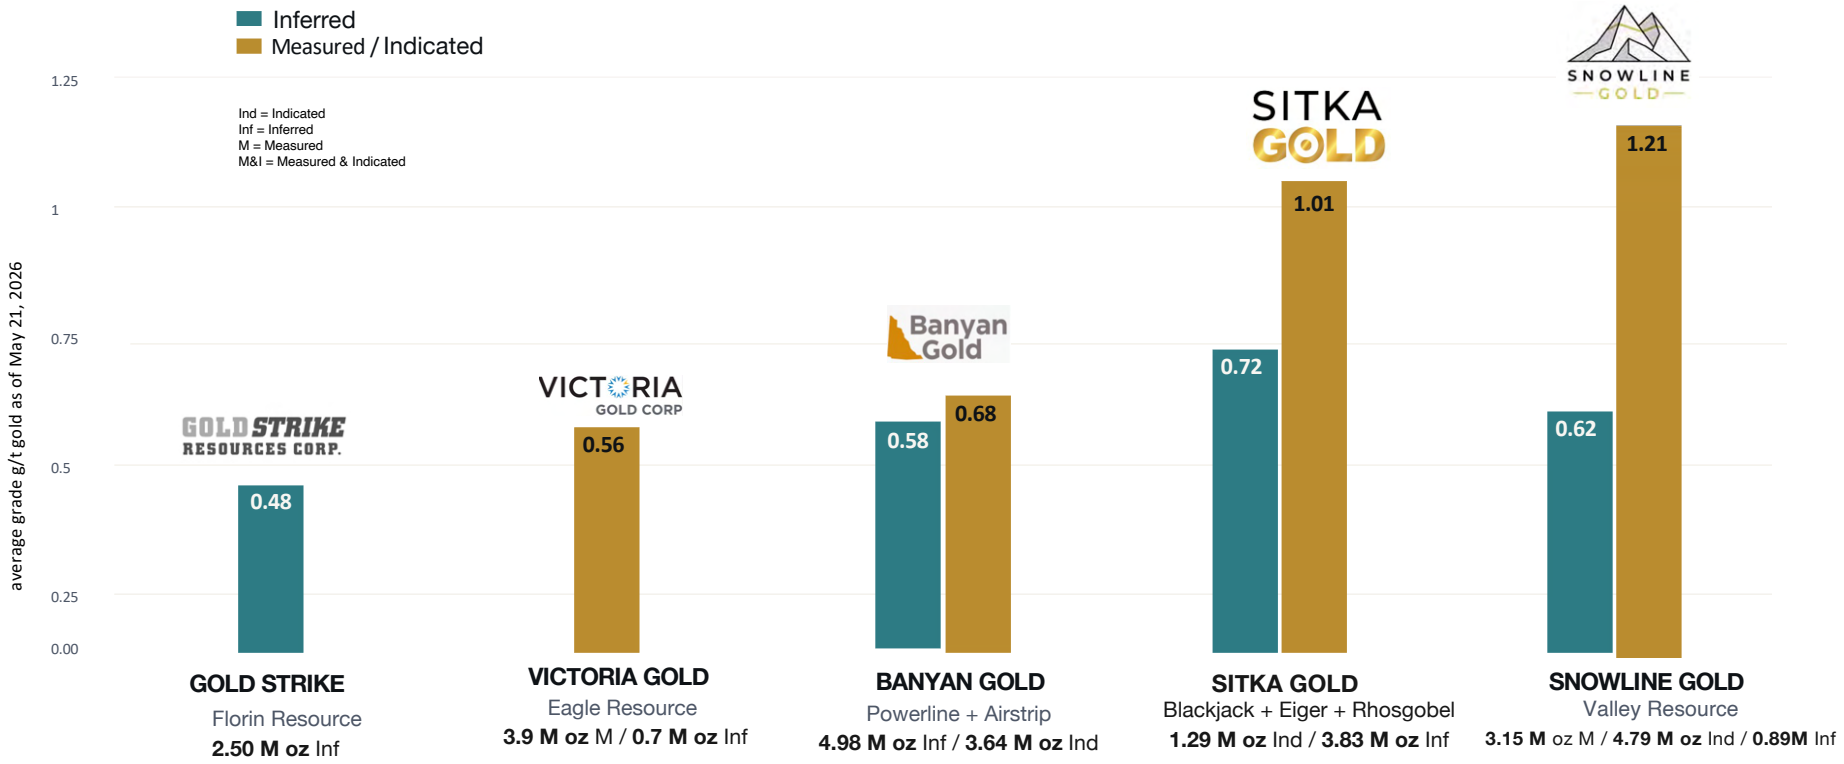

Sources: ATB Cormark and Public disclosures (as at Sept. 16, 2026)

Note a: Comparable companies include select Canadian gold focused developers with enterprise value greater than or equal to US$50 MM and flagship asset at PEA stage or earlier
Note b: Canadian peers include Gold X2, Maple, Radisson, Scottie, Spanish Mountain and TDG Gold; Yukon peers include Banyan, Snowline and White Gold
Note c: Refer to Appendix for a detailed overview of assumptions, inputs and sources
(1) Calculated as corporate G&A (adjusted for non-cash items) divided by total spend from 2020 to 2025
(2) Calculated as total AuEq ounces divided by total drilled meters included in the latest NI 43-101

GRADE COMPARISON (TOMBSTONE GOLD BELT COMPANIES)

Average gold grade (g/t Au), based on a 0.30 g/t cut-off; data as at May 21, 2026

SITKA GOLD

VALUATION

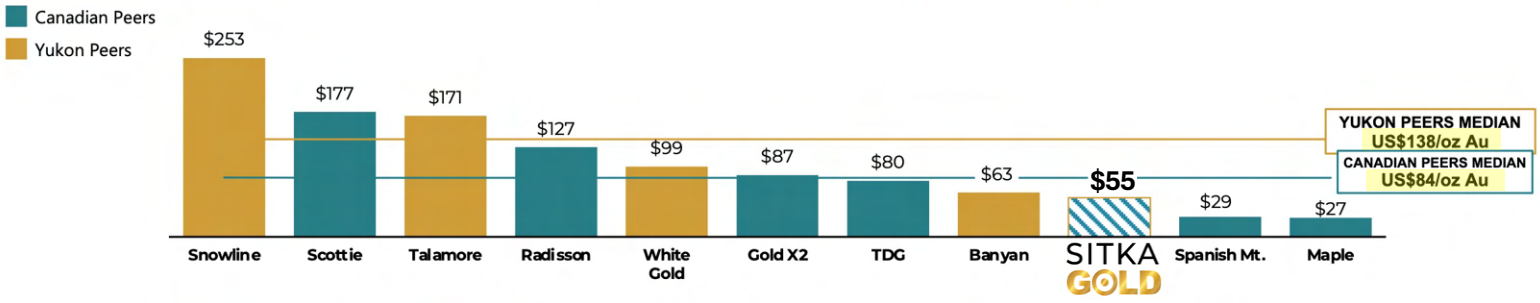

THE VALUE GAP IS SIGNIFICANT (as at August 17, 2026)

Sitka's current valuation remains well below comparable Yukon and Canadian peers highlighting re-rate potential

Compelling re-rate opportunity based on Sitka's current mineral resource

Further upside potential underpinned by ongoing 60,000 m diamond drill program

Note b: "Canadian Peers Median" includes Yukon peers; all median metrics exclude Sitka

(1) Calculated as EV compared to each company's total gold mineral resource

(2) Based on gold equivalent ounces

STRONG MOMENTUM - SHARE PRICE AND DRILLING TREND

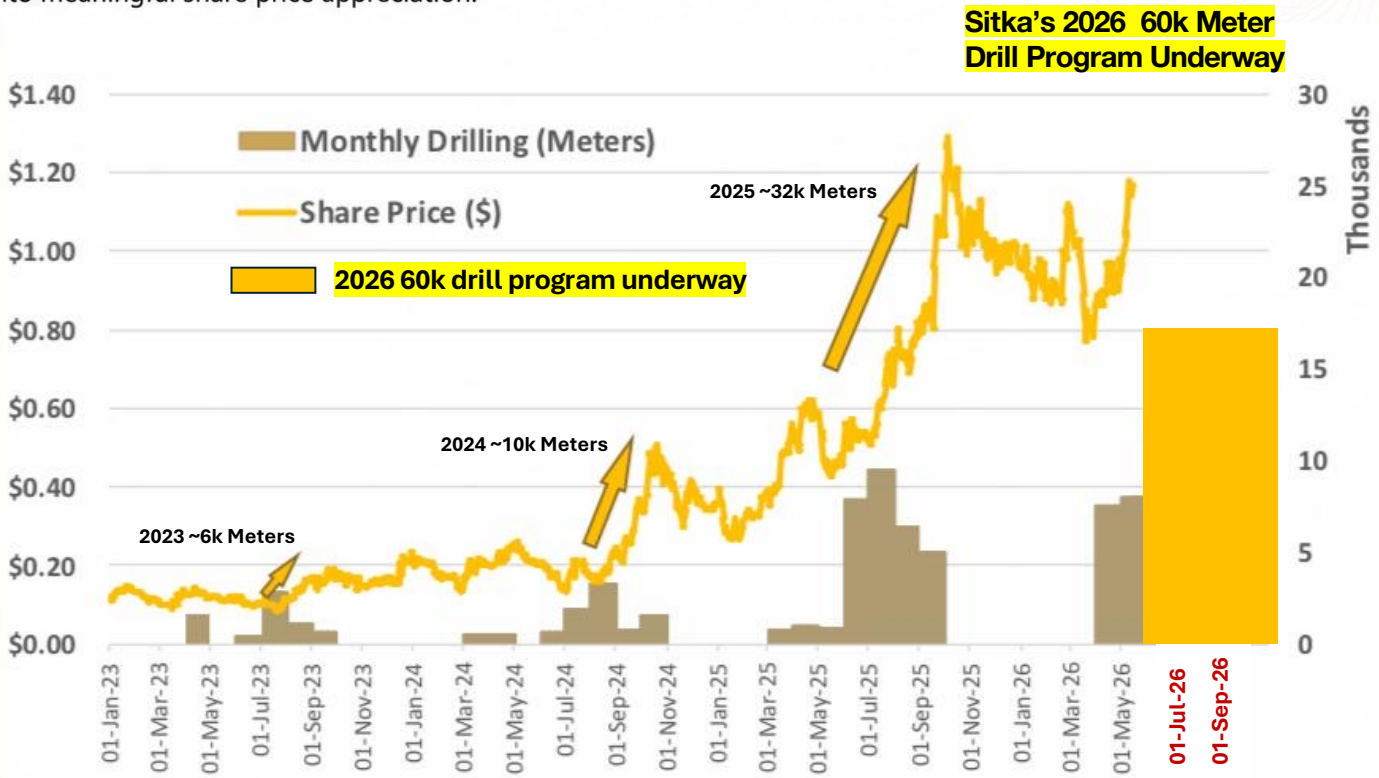

Exploration success has translated into meaningful share price appreciation.

KEY TAKEAWAYS

Over the last 4 years Sitka has **consistently** increased the size of its drilling program.

Steady news flow following the **seasonal** drill programs was well received.

The 2026 drill program will double the total meters drill at the RC project.

Note: Historical market performance and share price appreciation may not be indicative of future performance or future valuation outcomes.

GROWING THE RESOURCE, GROWING THE COMPANY

SITKA GOLD

Strengthening corporate governance, institutional readiness and strategic focus as Sitka advances towards the next stage of growth

CORPORATE ADVANCEMENT INITIATIVES

- **Strengthening Capital Markets & Legal Expertise** – *recent additions to the board and advisory network increase capital markets, governance, legal and strategic transaction capabilities*
- **Transitioning Toward Institutional Readiness** – *continued enhancement of governance practices, disclosure standards and corporate infrastructure aligned with larger development-stage companies.*
- **Increasing Strategic Focus** - *evaluation and rationalization of non-core assets support greater management focus and capital allocation toward advancing the RC Gold Project*
- **Positioning for the Next Phase of Growth** – *corporate evolution is occurring alongside rapid resource growth, increasing market visibility and advancement toward future economic studies*

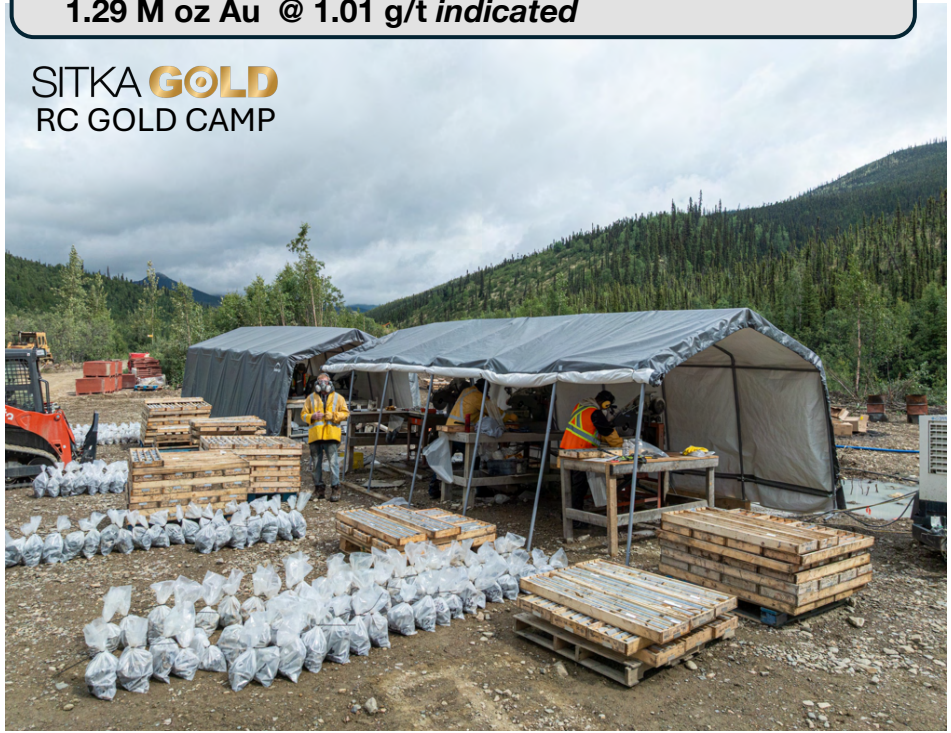

OUR PATHWAY FORWARD

SUMMARY + UPCOMING CATALYSTS

- **Rapidly Advancing Gold Discovery in the Tombstone Gold Belt** with increasing evidence of district-scale potential
- **Large intrusive related gold systems** have historically demonstrated a repeatable path to scale
- **Multiple targets and significant untested areas** support continued discovery upside
- **Unique gold and tungsten exposure** creates differentiated strategic optionality
- **Ongoing exploration** activity supports **continued growth** and a robust pipeline of news flow
- **Supported by continued strengthening of corporate governance** and institutional readiness

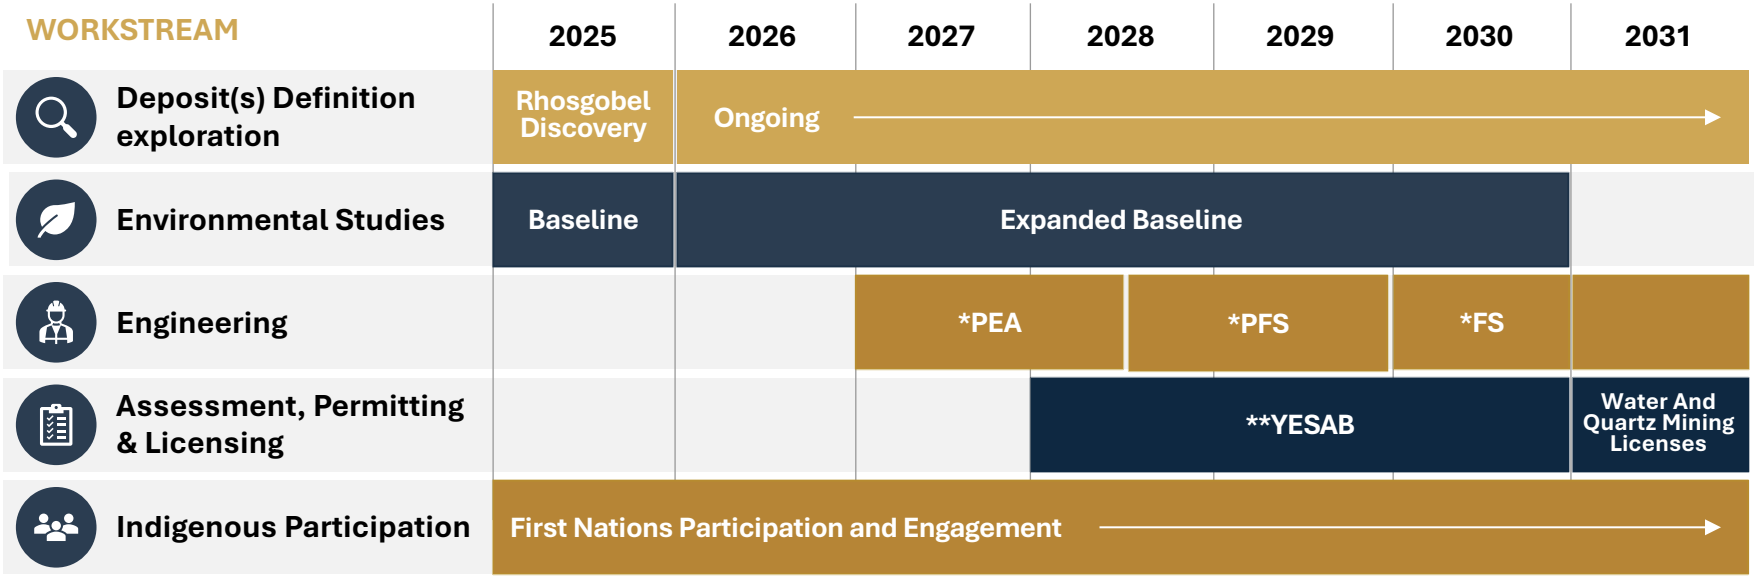

GOLD MINERAL RESOURCE ESTIMATE (March 2026)
3.83 M oz Au @ 0.72 g/t *inferred*
1.29 M oz Au @ 1.01 g/t *indicated*

DE-RISKING THE RC GOLD PROJECT

SITKA GOLD

A disciplined, phased approach to advance the RC Project, de-risk key technical, environmental and regulatory workstreams, and build strong foundations for future development.

* *Preliminary Economic Assessment, Pre-Feasibility Study, Feasibility Study*

** *Yukon Environmental and Socio-Economic Assessment Board*

CLEAR MILESTONES. LOWER RISK. BUILDING THE FOUNDATION FOR LONG-TERM VALUE.

SITKA GOLD CORP

TEN REASONS TO OWN SITKA

A rapidly growing district-scale gold discovery with **exceptional exploration upside** and multiple paths to value creation.

Multi-million-ounce Gold Discovery at RC Gold, Yukon
Emerging in Yukon's Tier 1 mining jurisdiction — Pit constrained Gold Resource of 1.29 M oz indicated + 3.83 M oz inferred across three deposits

Exceptional Discovery Efficiency
*Current resource delineated from **only 59,000 m** of diamond drilling*

Low Discovery Cost Per Ounce
Well below the peer-group average for comparable gold-exploration companies

District-scale Upside
11 known gold-bearing intrusions across a 100% owned 447 km² contiguous land package with multiple untested targets

Excellent Infrastructure
2 hour drive from Dawson City and International Airport — with year round road access

Attractive Valuation
~$450 M market cap (as at June 15, 2026) Analyst targets ranging from $2.75 to $4.00, trading at a discount relative to peers

At-surface, Pit-constrained Gold Resources
Mineralization from surface · avg 94.3 % Au recovery on whole-ore cyanidation. Non-refractory ore

Fully-funded 60,000 M Diamond Drill Program
Continuous news flow through 2026. Seven drill rigs turning targeting five zones, on track with over ~37,000 m completed (as at August 17th)

Tungsten By-Product Identified at Rhosgobel
Strong initial metallurgical results mark an encouraging first step in unlocking tungsten's potential as a by-product at Rhosgobel, with additional testwork underway

Award-winning Leadership
CEO Cor Coe, 2025 Yukon Prospector of the Year Proven track record of discovery, financing and mine development

SITKA GOLD

APPENDICES

SITKA'S RC GOLD PROJECT, YUKON

FOCUSED ON *DISCOVERY*. TURNING VISION INTO *VALUE*.

GOLD RESOURCE: 1.3 MOZ INDICATED + 3.8 MOZ INFERRED
A LARGE PIPELINE OF TARGETS, FAVORABLE TOPOGRAPHY AND EXCELLENT INFRASTRUCTURE

CONCEPTUAL MINE LAYOUT:

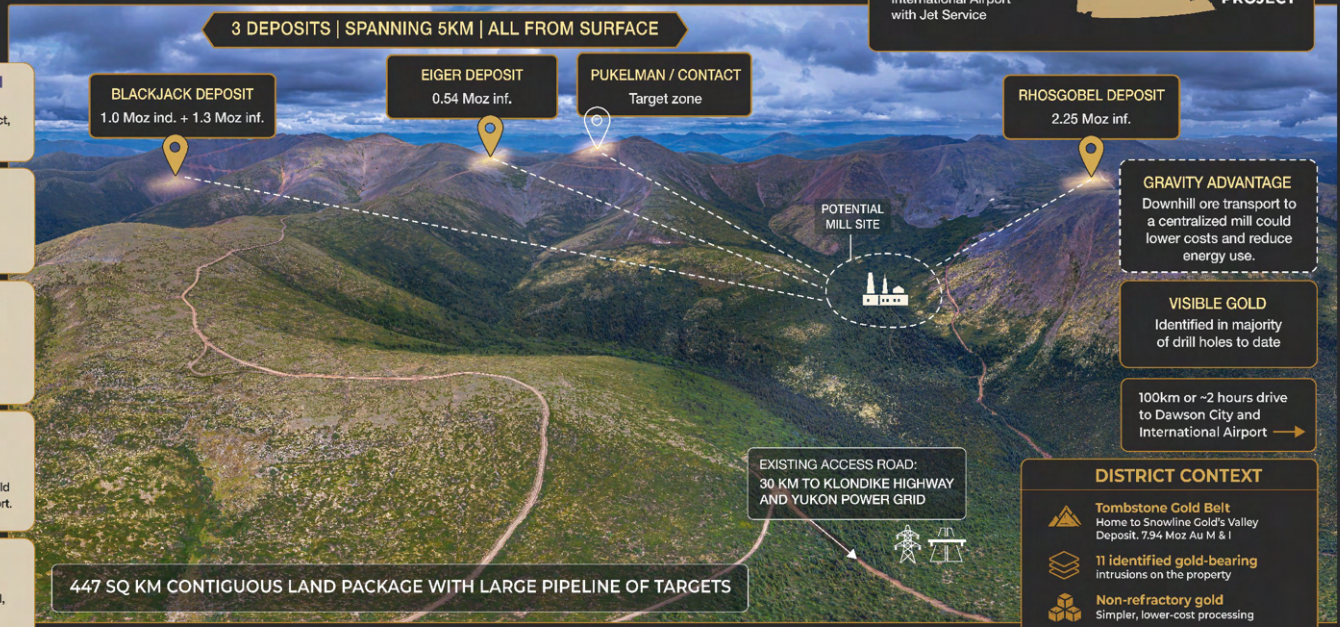

YUKON POWER GRID - 30 KM
The Yukon power grid is located within approximately 30 kilometres of the project, along the Klondike Highway corridor.

CLEAR CREEK
YEAR-ROUND WATER SOURCE - providing potential water source for future operations.

YEAR-ROUND ROAD ACCESS
Government maintained road from the Klondike Highway, approximately 2-hour drive from Dawson City, which has a 5,000-foot paved runway capable of handling jet aircraft.

VALLEY SITE — POTENTIAL CENTRALIZED PROCESSING
The valley floor offers flat ground, road access, and water. All three deposits could feed a single mill via downhill ore transport.

GRAVITY ADVANTAGE
Deposits sit at elevation above the valley floor. Conveyors could move ore downhill, reducing haulage costs.

GRAVITY ADVANTAGE
Downhill ore transport to a centralized mill could lower costs and reduce energy use.

VISIBLE GOLD
Identified in majority of drill holes to date

100km or ~2 hours drive to Dawson City and International Airport →

DISTRICT CONTEXT

- **Tombstone Gold Belt** — Home to Snowline Gold's Valley Deposit. 7.94 Moz Au M & I
- **11 identified gold-bearing** intrusions on the property
- **Non-refractory gold** — Simpler, lower-cost processing
- **Planned plant flowsheet** — Gravity + Flotation + Cyanidation

1.3 Moz Ind + 3.8 Moz Inf
1.3 Moz indicated at 1.01 g/t gold
3.8 Moz inferred at 0.72 g/t gold
delineated with only 59k m of drilling

THREE GOLD DEPOSITS
spanning 5 km
all from surface

EXCELLENT RECOVERIES
Up to 96% gold recovery
Up to 85% Tungsten recovery

60,000 M DIAMOND DRILL PROGRAM UNDERWAY
2026 drilling will double total drilling to date and test additional targets - Pukelman, Contact, Bear Paw and others.

YEAR-ROUND ROAD ACCESS
Only 2 hours from Dawson City

RESPECTING FIRST NATIONS
RC Gold is located within the traditional territories of the First Nation of Na-Cho Nyak Dun and Tr'ondëk Hwech'in. Sitka Gold is committed to respectful engagement with Indigenous communities.

Scottie	Scottie	703	100.9	7.0	Preliminary Economic Assessment, NI 43-101 Technical Report, for the Scottie Gold Mine Project in Northwestern British Columbia, Canada (effective date: October 28, 2025)
Radisson	O'Brien	2,320	428.4	5.4	O'Brien Gold Project NI 43-101 Technical Report & Preliminary Economic Assessment (effective date: June 27, 2025)

Created by ATB Cormark | Sources: Public disclosures

Note a: Comparable companies include select Canadian gold focused developers with enterprise value greater than or equal to US$50 MM and flagship asset at PEA stage or earlier

Note b: Canadian peers include Gold X2, Maple, Radisson, Scottie, Spanish Mountain and TDG Gold; Yukon peers include Banyan, Snowline and White Gold

(1) Calculated as total AuEq ounces divided by total drilled meters included in the latest NI 43-101

THE INTRUSIVE ADVANTAGE

SITKA GOLD

Why intrusive gold systems tend to create larger, longer-life, district scale mining operations

CHARACTERISTIC	INTRUSIVE SYSTEMS	VEIN DEPOSITS	EPITHERMAL DEPOSITS	OROGENIC DEPOSITS	PLACER DEPOSITS
Multi-Million Ounce Scale	EXCELLENT	LIMITED	EXCELLENT	EXCELLENT	LIMITED
Vertical Continuity	EXCELLENT	VARIABLE	LIMITED	GOOD	POOR
Bulk Tonnage Potential	EXCELLENT	POOR	MODERATE	MODERATE	GOOD
District Scalability	EXCELLENT	LIMITED	MODERATE	GOOD	POOR
Geological Predictability	GOOD	VARIABLE	VARIABLE	MODERATE	GOOD
Potential Mine Life	LONG	SHORT	MODERATE	MODERATE	LONG
M&I Drill Spacing Requirements	WIDE	NARROW	MODERATE	MODERATE	WIDE

APPENDIX C: EAGLE GOLD MINE PROCESS UPDATE

Boroo's announced exclusivity agreement to potentially acquire the Eagle Gold Mine

BOROO

- Privately held investment holding company focused on acquiring, developing and operating mining properties globally
- **Recognized specialist in operational turnarounds and responsible mine development**
- Owns and operates a portfolio of producing and development-stage assets across Central Asia and South America
- Maintains ~56% controlling stake in Steppe Gold Limited (TSX:STGO)
- **Transformed the Lagunas Norte Mine from care and maintenance into one of Peru's largest gold mines**
- Since 2018, Boroo has successfully completed several strategic acquisitions including but not limited to:
  - **ALTURAS PROJECT** (Chile) – acquired from Barrick in 2025
  - **KHARMAGTAI PROJECT** (Mongolia) – acquired interest via the acquisition of Xanadu Mines in 2025
  - **LAGUNAS NORTE MINE** (Peru) – acquired from Barrick in 2021
  - **BOROO GOLD MINE** (Mongolia) – acquired from Centerra in 2018

Eagle Gold Mine Exclusivity Agreement (April 28, 2026 Update)

- On April 23, 2026, Boroo Pte. Ltd. ("**Boroo**") entered into an exclusivity agreement with PricewaterhouseCoopers Inc., in its capacity as receiver and manager of Victoria Gold Corp. (the "**Receiver**"), in respect of Boroo's proposed acquisition of the Eagle Gold Mine in the Yukon
- Boroo has an initial 90-day exclusivity period (+ a potential 90-day extension) to:
  - Complete further due diligence at the Eagle Gold Mine
  - Negotiate the terms of a potential definitive purchase agreement with the Receiver
  - Advance discussions and consultation with the Yukon Government and the First Nation of Na-Cho Nyäk Dun to identify the best path to re-start the Eagle Gold Mine in a manner that ensures the interests of Yukoners

Sitka's Perspective

- While operating, the Eagle Gold Mine proved that the Tombstone Gold Belt could be mined at a large scale
- The Eagle Gold Mine incident has had a lasting impact on mining in the Territory
- The entry of a well-capitalized, proven operator to the region signals that the Yukon is open for business
- **Sitka aims to continue to demonstrate the prospectivity of its portfolio in a region with renewed momentum**

DISCLAIMER

Certain information contained in this presentation includes market and industry data that has been obtained from, or is based upon estimates derived from, third-party sources, including industry publications, government reports, regulatory materials, and publicly available information. This includes, without limitation information regarding gold and tungsten mineral resource estimates, comparable company valuations and peer benchmarking data, commodity pricing, critical mineral policy, and regional mining industry statistics. Such information has been derived from sources including, among others, the ATB Cormark, S&P Capital IQ, Bloomberg, the U.S. Geological Survey, the International Tungsten Industry Association, the Government of Canada, and other government and industry publications. Although the data is believed to be reliable, the Company has not independently verified the accuracy, currency, reliability, or completeness of any of the information from third-party sources referred to in this presentation, nor has it ascertained the underlying economic or industry assumptions relied upon by such sources. Market and industry data is subject to change and cannot be verified with certainty due to limits on the availability and reliability of raw data, the voluntary nature of data-gathering processes, and other limitations and uncertainties inherent in any statistical survey or data collection methodology. The Company hereby disclaims any responsibility or liability whatsoever in respect of any third-party sources of market and industry data or information contained herein. Readers are cautioned not to place undue reliance on such market and industry data.

QP STATEMENT

The scientific and technical content of this news release has been reviewed and approved by Cor Coe, P.Geo., Director and CEO of the Company, and a Qualified Person as defined by National Instrument 43-101.

TECHNICAL INFORMATION – RC GOLD PROJECT

Unless otherwise indicated, the Company has prepared the technical information in this presentation related to the RC Gold Project based on information contained in the technical report entitled "*RC Gold Project, NI 43-101 Technical Report, Dawson Mining District, Yukon Territory*", with an effective date of March 31, 2026, authored by Ronald G. Simpson, P.Geo., and the Company's news release dated May 14, 2026 available on the Company's website and under its profile on SEDAR+ (the "**Disclosure Documents**"). For readers to fully understand the information in this presentation, they should read the Disclosure Documents in their entirety, including all qualifications, assumptions and exclusions that relate to the information set out in this presentation which qualifies the technical information. The Disclosure Documents are each intended to be read as a whole, and sections should not be read or relied upon out of context. The technical information is subject to the assumptions and qualifications contained in the Disclosure Documents.

The scientific and technical content of this news release has been reviewed and approved by Cor Coe, P.Geo., Director and CEO of the Company, and a Qualified Person as defined by National Instrument 43-101.

BURRO CREEK – HISTORICAL ESTIMATE

The historical estimate on Sitka's Burro Creek Gold-Silver Project was prepared for Northern Freegold Resources Ltd. in 2011 based on drilling of 87 reverse circulation and diamond drill holes and samples from 9 adits, for a total of 6,667 m and 2,682 assays. The Burro Creek deposit contains a historical mineral resource estimate with an historical indicated resource of 2,331,871 tonnes grading 1.01 g/t Au and 36.77 g/t Ag (yielding 122,491 ounces at a 1.63 g/t Au equivalent) and a historical inferred resource of 2,247,069 tonnes grading 0.60 g/t Au and 30.95 g/t Ag (yielding 81,304 ounces at a 1.13 g/t Au equivalent), both using a cut-off grade of 0.50 g/t Au.

A qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves and Sitka is not treating the historical estimate as current mineral resources or mineral reserves. Significant data verification and further exploration may be required to verify the historical estimate. Sitka considers the 2011 historical estimate to be relevant and reliable given the estimate was prepared with practices consistent with CIM (2005) applied to the generation of the resource estimate.

The historical estimate was based on the following assumptions: (a) Indicated and Inferred categorizations are historical and in accordance with Canadian Institute of Mines (2005) definitions; (b) Inverse distances squared interpolation restricted to mineralized domains we used to estimate gold (grams/tonne Au) and silver (grams/tonne Ag) grades into the block models; (c) Gold and silver content were combined into a gold equivalent value for resource reporting; AuEq grade is based on 0.017 gram of gold for each gram of silver; and AuEq Metal prices are: US$846.00/oz gold, US$14.40/oz silver; (d) No capping of gold and silver values were used; and (e) Specific gravity was 2.51.

Sitka encourages readers to refer to the report entitled "*NI 43-101 Technical Report on the Burro Creek Project. Mojave County, Arizona*", dated January 15, 2025, authored by J. Pautler, available on the Company's website.

DISCLOSURE ON REGIONAL & NON- REGIONAL PROPERTIES

The information below and elsewhere in this presentation regarding other issuers, projects and properties has been derived from publicly available disclosure published by the applicable issuers as of June 2026, including technical reports and other disclosure filed on SEDAR+ and posted on the issuers' websites. Certain information regarding adjacent and regional properties is disclosed solely to provide geological context and should not be interpreted as suggesting that similar mineralization, resources, reserves or exploration results will be obtained on the RC Gold Project. Information regarding non-regional projects is provided for valuation and comparison purposes only. Readers are encouraged to refer to the applicable issuers' public disclosure records for further information regarding those properties and projects, including the key assumptions, parameters, methods and risks applicable to the disclosed mineral resource and mineral reserve estimates. Certain source disclosure reports tonnage and/or contained metal in thousands or otherwise rounded figures, which have been converted to full tonnes and ounces for presentation in this table. Figures may have been rounded and totals may not add or calculate precisely from the grades shown due to rounding in the source disclosure.

Issuer & Project	Mineral Reserve or Resource Category	Tonnes	Grade	Ounces (Au)
Freegold Ventures Limited, *Golden Summit Project*	Indicated Resources	431,949,000	1.24 g/t Au	17,236,000
	Inferred Resources	357,614,000	1.04 g/t Au	11,964,000
Kinross Gold Corporation, *Fort Knox*	Proven Reserves (Fort Knox)	51,366,000	0.39 g/t Au	645,000
	Probable Reserves (Fort Knox)	230,870,000	0.37 g/t Au	2,729,000
	Measured Resources (Fort Knox)	6,606,000	0.36 g/t Au	77,000
	Indicated Resources (Fort Knox)	110,824,000	0.33 g/t Au	1,185,000
	Inferred Resources (Fort Knox)	101,579,000	0.32 g/t Au	1,031,000
	Indicated Resources (Gil)	29,516,000	0.56 g/t Au	533,000
	Inferred Resources (Gil)	4,026,000	0.49 g/t Au	63,000
Snowline Gold Corp., *Valley Deposit*	Measured Resources	69,700,000	1.41 g/t Au	3,150,000
	Indicated Resources	134,300,000	1.11 g/t Au	4,790,000
	Inferred Resources	44,500,000	0.62 g/t Au	890,000
Banyan Gold Corp., *Aurmac Project*	Indicated Resources	167,300,000	0.68 g/t Au	3,639,000
	Inferred Resources	267,200,000	0.58 g/t Au	4,985,000
Victoria Gold Corp., *Brewery Creek*	Measured Resources	13,300,000	1.06 g/t Au	452,000
	Indicated Resources	21,200,000	1.02 g/t Au	693,000
	Inferred Resources	36,000,000	0.88 g/t Au	1,020,000
	Measured and Indicated	34,500,000	1.03 g/t Au	1,140,000
Victoria Gold Corp., *Eagle Mine*	Measured Resources	36,236,598	0.62 g/t Au	704,653
	Indicated Resources	197,960,177	0.57 g/t Au	3,595,980
	Inferred Resources	29,595,257	0.52 g/t Au	497,018
	Measured and Indicated	234,196,775	0.57 g/t Au	4,303,000
Victoria Gold Corp., *Raven Deposit*	Inferred Resources	19,956,934	1.67 g/t Au	1,070,239

DISCLOSURE ON REGIONAL & NON-REGIONAL PROPERTIES (Continued)
